### Philips Lighting Solutions for Lviv Arena

Lviv Arena is one of the newest stadiums in Europe, started in 2008. With its specially constructed stands and the absence of a track and field tracks, the full effect and space is maximized for its spectators.

Philips submitted its proposals in 2010 and was selected as a subcontractor for lighting solutions. An important factor in this decision was that Philips had already implemented another successful sports lighting project in Ukraine, at the Donbass Arena.

Despite changing deadlines during the construction process, Philips managed to complete the project quickly and efficiently.

Within this project, Philips Ukraine completed the following scope of work:

- Lighting concept development
- Technical support and calculations as per to the project requirements
- General assembly, targeting, commissioning work and measurement - performed jointly with a number of partner organizations

General Planner – Albert Wimmer  
ZT Gmbh (Vienna, Austria), Arnika  
architecture buro (Lviv, Ukraine)  
General Contractor: Altcom  
(Ukraine)  
Put into operation – October 29,  
2011  
Capacity – 34, 915

Philips Lighting Solutions installed and illuminated the playing field at the Lviv stadium in accordance with FIFA<sup>1</sup> and UEFA<sup>2</sup>'s standards for broadcasting television football matches. The lighting system has 5 modes of illumination, of which the highest level is 2,400 lux.

Director for the Construction of Stadiums and Infrastructure for EURO 2012 in Lviv city, Volodymyr -Onishchuk, notes: "The Lviv Arena is a solid stadium with excellent quality. The lighting from Philips is fantastic both in terms of price and quality; that's something that is very important, given that the Lviv Arena was built by public funding from the state budget."

<sup>1</sup> Federation International de Football Association

<sup>2</sup> Union of European Football Associations

Philips lighting was installed in the following areas of Lviv Arena:

- Playing field – 288 Philips ArenaVision sports floodlights
- Grandstands (including anti-panic illumination) – 84 luminaries
- Internal areas (VIP areas, lodges, common areas, technical zones) – 8,139 luminaries.
