Real professionals increase their sales with Philips LED tubes

**REAL
PROs**
**REAL
QUALITY**

A LED tube for every **application**

LED tubes only use around half the energy of fluorescents, so the energy savings can repay within a few months. From 24/7 usage downwards, it's the installation costs and tube lifetimes that overwhelmingly set actual repayment times.

We have a light for every application, and a LED tube for every application: bright easy-to-fit tubes that last and last. We've recently broadened our range with some key new versions. Like all our LED tubes, they have the industry's lowest failure rates for ultra reliable operation and lifetime.

Our MASTER LEDtube T8 range gives 50,000 hour lifetime and is for applications needing high performance. Versions come with world-class ultra high 172 lm/W efficiency, ultra high 3700 lumen output, ultra long 70,000 hour life. There's a MASTER LEDtube T8 Universal, too, and a new MASTER LEDtube T8 sensor that brings even greater energy savings in areas that aren't continuously occupied. Our MASTER LEDtube T5 range has Ultra Efficiency types, too.

Fast installation, long reliable life

Philips LED tubes offer 100% safe and hassle-free installation with a simple tube-for-tube replacement. Our EM, mains and InstantFit HF tubes fit straight into existing luminaires.

Our range has the widest ballast compatibility in the market, including the great majority of 600, 1200 and 1500mm versions (see www.philips.com/ledtube).

LED tubes have more than double the life of fluorescents to halve the cost of maintenance. Even with installation and maintenance costs, our tubes pay for themselves within a few months for permanently lit sockets.

High quality professional tubes

Our LED tubes won't flicker or cause glare. They switch on instantly with excellent and uniform color consistency. Defined tube/ballast combinations can be dimmed. And rotating end caps can direct the light where needed. So, a new generation of attractive energy-saving alternatives to fluorescent tubes.

A **LED tube** for every need from the world leader in lighting

Simplicity. One High-Output LED tube **fits all**

Our new CorePro LEDtube T8 Universal makes it simplicity itself to upgrade the banks of fluorescent tubes you'll see above you as you walk through most buildings. Millions of them are still lighting factories, shopping malls, supermarkets, warehouses and car parks.

It works with all ballast types – EM, HF and mains power. InstantFit gives simple tube-for-tube replacement with 100% safe and hassle-free installation. Just take out the old fluorescent tube and replace it with a 1200 mm or 1500 mm LED tube of the same length. It doesn't get any easier. You get up to 2700 lumens (High Output) with a 30,000 hour life that is double that of fluorescents. Unlike other 'Universal' tubes, all our LED tubes are truly universal, and give out bright, high quality light.

That dramatically cuts installation (and maintenance) times, particularly if you're replacing a variety of ballasts because the lighting installation has been extended over time. You now don't need to check which ballasts will be compatible. They all are! That also means an end to duplicate product stocks.

Smart LED lighting is easily installed

The MASTER LEDtube T8 sensor can make big savings in energy costs when replacing fluorescent tubes in areas that aren't continuously occupied. An integrated motion sensor automatically dims the lights when nobody's around in places like covered car parks, corridors and walkways, storage areas, data centers and server rooms. Areas occupied for less than half the time can cut energy costs by more than 70%.

Installation is simple

The MASTER LEDtube T8 sensor is a fast 1-to-1 replacement for 1200 and 1500 mm T8 fluorescent tubes with EM ballasts. So, upgrading fluorescent tubes to energy saving LED lighting couldn't be easier!

And being an integrated solution, you need no external sensors, controls or wiring. The Passive Infra-Red (PIR) sensor is built into the end cap and detects motion within a 5-meter radius (when luminaires are no higher than 2.5 meters above the ground).

Finding the right T8 tube

Philips LED tube range

The installer's choice

Installers have even more reasons to choose Philips LED tubes. As you'd expect from the world's leading name in lighting, our quality and attention to detail mean that we make your life safer and easier.

HF compatibility

No wires to replace, no hassle changing drivers; InstantFit works with High Frequency electronic ballasts, making it easy and safe for all installation methods. All you have to do is slot the tube into your existing fitting. And our Universal tubes, which also embed InstantFit, work with EM ballasts and mains too.

Pin safety

With Philips products you can safely touch the other end-cap when installing the tube. The integrated driver is also safely isolated from touchable parts. Philips LED tubes adhere to all UL and IEC pin safety requirements.

Rotating end-caps

In many applications the pin fitting needs to be rotated. This can be a problem as LED tubes only provide directional light. Our T8 MASTER LEDtubes have rotating end caps that let you rotate the tube by up to 90 degrees. So you can always direct the light to best effect.

Finding the right output

For ultra-output applications, our solutions meet lighting industry standards (EN12464-1) by providing high light levels without causing discomfort or glare*.

Lux

Working, typing reading and data processing require sufficient light with a minimum lux level

Sufficient light

- › Key parameter for minimum required light is indicated in EN12464-1 in lux (lumens per square meter).
- › EN12464-1 prescribes minimum lux values, uniformity of illumination, and color rendering index, depending on the task.

Unified Glare Rating (UGR)

The amount of glare, annoyance or reflection created by high or non-uniform brightness must be kept to a minimum

Discomfort glare

- › Sensation of annoyance or reflection caused by high or non-uniform brightness (eg. on computer screen).
- › Amount of glare is indicated in EN 12464-1 standard by Unified Glare Rating (UGR).

Lighting requirements

EN12464-1 prescribes minimum lux values, uniformity of illumination and color rendering index, depending on the task

Supermarkets / Retail

- › For Supermarket and Retail applications 500 lux counts as minimum value.
- › UGR standard for Supermarket applications is also set at max 19 UGR.

Industrial

- › For Industry applications, there are many sub segments, each having their own specific standards. In the storage industry segment 300 lux counts as minimum value.
- › UGR standard for Industry applications is set at max 25 UGR.

Office / School / Healthcare

- › For Office applications 500 lux counts as minimum value for writing, typing, reading, data processing, conference and meeting rooms.
- › UGR standard for Office applications is set at max 19 UGR.
- › For most Healthcare applications 200 lux counts as minimum value.
- › UGR standard for applications is set at max 22 UGR.

* Final light quality, besides the LED tube, also depends on application circumstances like e.g. type of luminaire used and amount of daylight.

Finding the **right solution** for your application

New standard for car parks

Car parks and transportation networks need to feel bright and welcoming 24 hours a day. White LED light has a higher perceived brightness and superior color rendering, so people feel safer. And because LED is highly reliable and energy efficient, your customers will welcome the savings too.

› Choose CorePro LED tubes **Standard Output** for the **most attractive** payback time.

High output for higher standards in car parks

High Output LEDtubes raise the standards in car parks even higher. With a light output of up to 3100 lumen they provide maximum visibility and safety – particularly important in car parks that operate right around the clock.

› Choose MASTER LED tubes **High Output** to reach **higher standards** for visibility and safety in car parks.

High output on the high street

Retail stores and hospitality venues know light has the power to attract. It creates irresistible displays, brings brands to life and encourages customers to spend longer in store. With our LED tubes you can light up sales at the same time as reducing energy and maintenance costs.

› Choose MASTER LED tubes **Ultra Output** to optimize visibility of products on display and **enhance the shopping experience** for customers.

High output for offices

With a light output of up to 3100 lumen, our High Output LED tubes provide brilliant light quality with the best lumen per watt. A simple switch for offices and healthcare settings that saves on energy but feels bright and welcoming.

› Choose MASTER LED tubes **High Output** LED tube for a **simple switch** for offices and healthcare settings that save on energy.

Ultra output for more performance in offices

Office and school lighting can influence energy levels, performance and wellbeing. Our solutions shine with impressive, high quality light to create the most comfortable ambience that complies with all office norms and still saves on energy. So business is always a pleasure.

› Choose MASTER LED tubes **Ultra Output** to for **the best light output** in the most demanding office and healthcare applications.

Ultra output for industry applications

In ultra-demanding applications, our Ultra Output LEDtubes take safety and performance to the next level. With a super bright light output of up to 3700 lumen they offer the best light output for maximum visibility and minimal maintenance.

› Choose MASTER LED tubes **Ultra Output** to for the **best light output** in industry applications.

Ultra Efficient for extremely demanding industry applications

In ultra-demanding applications, 24/7 operations can run up expensive energy bills. With a super bright light output of up to 3700 lumen our Ultra Efficiency combine both the best light output for maximum visibility AND the highest lumen per watt efficiency. With an ultra-long lifetime of 60,000 hours, these lamps offer the best Total Cost of Ownership over lifetime.

› Choose MASTER LED tubes **Ultra Efficiency** for the best light output in very demanding industry applications along with the **best Total Cost** of Ownership over lifetime.
