Day-Brite / CFI SR strip retrofit kit is designed to offer the end user a cost effective way to increase the efficiency and lumen output of existing strip fixtures. Custom fabricated for the existing channel width, the SR conversion kit is easy to install and provides for high efficiency lighting.

Applications include distribution, warehouse, aisle lighting, retail applications and virtually anywhere existing strip fixtures are currently in use.

SR retrofit kits are available with a variety of lamp and reflector combinations allowing the customer to design the SR system to meet or exceed existing light levels and customize the "look" to match their specific needs. Philips Optimum recommends the coupling of the Enhanced Specular reflector with high lumen T8 lamps as a way to maximize lumen output and fixture efficiency.

The SR socket bar retrofit is designed for easy installation in existing strip fixtures.

Ordering guide

Example: SR()225273HIWWG(AS)850TG

*4 Wireguard only available with SR when ordered with no reflector or industrial Style (I) Reflector.
*5 SR ordered with No Ballast will be shipped with Shunted Sockets, unless Unshunted Sockets are specified.

*6 Consult factory for manufacturing specific ordering codes/availability

SR Strip retrofit kit

T8 or T5HO

Optical Reflector

The system is precision brake formed of the selected aluminum material. The reflector is removable without the use of tools, using 1/4 turn fasteners to secure it in place.

Lampholders

Made of a Polycarbonate material; these lockingstyle lampholders are utilized to ensure positive lamp retention. Additionally, the material contributes to a longer life product in high temperature applications.

Product Construction

The channel cover is made from 0.028" cold rolled steel, and custom fabricated to fit the existing channel width. The brake formed cover is designed with ease of installation in mind. Exterior surfaces are finished with highly reflective white paint.

Ballasts

All ballasts are electronic programmed-start (T5HO) or instant-start (T8) as a standard. Optional ballasts are available, consult factory for available systems and system specifications. Available voltages: 120v, 277v, 347v, voltage

Listings

All fixtures are UL and CUL listed.

Dimensional drawing

8 inch reflector (S)

12 inch reflector (I)

ASM reflector (AS)
