

interact Pro

Smart lighting for top class schools

Transform your school into a state-of-the-art and inspirational learning environment with Interact Pro

We believe smart lighting can create a smarter learning environment. Interact Pro is an intuitive app and dashboard that works with Philips Interact Ready lighting and lets teachers adjust the classroom atmosphere to create exactly the right ambience. It's a smart, flexible and energy-conscious choice for any school that wants to give pupils the best possible education, with light that enhances learning and brings out the best in both students and teachers.

Individually set your light settings with the Interact Pro app.

A great learning environment

- ✓ Light can be tailored to suit the learning task or the time of day.
- ✓ Increase light levels to invigorate pupils when they need to be more active, supporting a fresh start to the day (morning) or afternoon (after lunch break).
- ✓ Decrease light levels to create a relaxing environment during breaks or quiet time.

Energy conscious

- ✓ Tailor lighting to your school schedules, timetables or between classes foot traffic using automated lighting profiles and dimming zones.
- ✓ Use motion sensors to activate the right light levels instantly when people are present.
- ✓ Use daylight sensors to reduce light levels when natural light is strong.

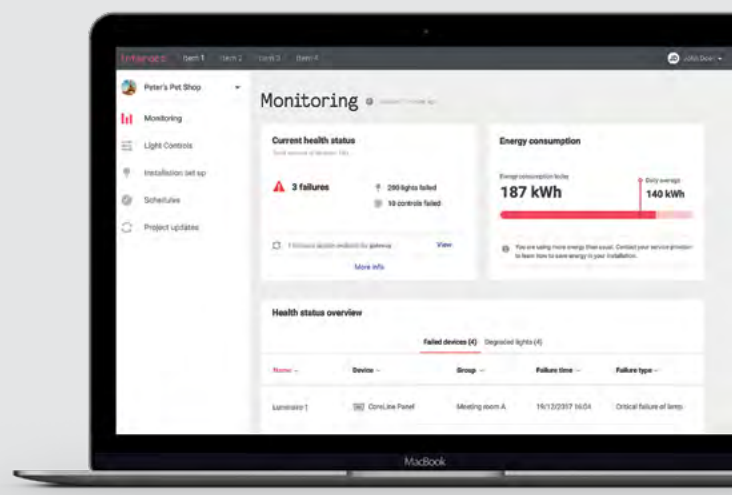

Efficient

- ✓ Lights dim or turn off automatically in empty classrooms, corridors and floors.
- ✓ Schedule lights to stay on after hours in zones where students or teachers are still working.
- ✓ Lights activate instantly when sensors detect movement.

Continuously improving

- ✓ Take control of your lighting on-site or remotely via the Interact Pro dashboard.
- ✓ Identify areas using a lot of light and adjust settings to save energy.
- ✓ Optimize lighting schedules where lighting usage seems out of sync with usage.
- ✓ Meet sustainability and benefit from energy rebate program targets.

Smart lighting for top class schools

I'm proud of my school's energy saving lighting and its commitment to the environment.

There's no glare, flicker or other visual discomfort so I don't get distracted or tired.

I can set the lighting for every kind of activity from focussed tasks and quiet reading time to creative pursuits and lively group work.

I feel energized and ready to start learning thanks to the right light levels in the classroom.

Reading is a lot easier on my eyes and supports my visual health and wellbeing.
