ready.

"Philips connected lighting offers benefits that conventional systems can only dream of. It is now possible to install lighting that enhances comfort, saves energy, and provides data insights for further optimisation and savings."

Turn on a
game-changer

World class connected lighting that puts the power of IoT in your hands

Many business owners will go the extra mile to get the very best out of their most important assets – their people. The working environment has a direct impact on their morale and productivity. There are many ways to achieve a better workplace – **and one of them is through the right lighting.**

Why upgrade to connected lighting?

Connected lighting means that LED lights with **integrated sensors** are connected to **application software.** As a result, it's possible to automate and optimise light settings for different areas within the building, allow users to **personalise light settings** and business owners to collect anonymised data on **energy and cost performance.**

With the new **Interact Pro dashboard and app,** connected lighting is now available to **small and medium enterprises** with up to 200 light points – at a price that makes upgrading a no-brainer. It seamlessly works with our **Interact Ready** CoreLine luminaires and MasterConnect LED tubes which offer a direct point-for-point replacement of conventional lights.

Bright benefits
for your customers

Installing lights –
enjoying advantages

Saving energy and costs while providing the **best possible light to work**, create and do business in: **Connected lighting** is all this and more. Preparing for this **next chapter in lighting** means investing in productivity, sustainability, innovation and image.

The benefits for your customer:

✔ **Optimised and personalised light** levels for daily business, supporting employees, tasks, safety and security

✔ **Maximum energy and cost savings** via schedules, motion and daylight sensing

✔ Demonstrate **social responsibility**

✔ Monitor lighting and energy with the **Interact Pro dashboard** for further optimisation

With connected lighting you can offer your customers a smart upgrade of conventional lights. Recommending and installing connected lighting solutions also gives you the chance to become their trusted expert in this new and expanding field.

The benefits for you:

✔ **World class connected lighting** for small and medium-sized enterprises

✔ **Easy to install,** no need for separate antennas, radio boxes or signal cables

✔ Speedy set up with the intuitive **Interact Pro app**

✔ Get invaluable data from the **Interact Pro dashboard** and **become a trusted advisor**

✔ The Interact Pro app and dashboard works seamlessly with our Interact Ready luminaires and lamps

Built for **success**

The **Interact Pro dashboard and app** work with a range of Philips luminaires and lamps and a set of wireless switches and sensors that are Interact Ready. You can customise the software's settings for specific workspaces. Whether you're connecting 20 light points or 200, Interact Pro helps everyone to work smarter.
