EvoKit Retrofit Kit

SpaceWise Technology

SpaceWise Technology 4.1 (SWZ) – To be purchased separately

- Optional SpaceWise automated wireless technology via the unique Philips Evokit SpaceWise Accessory provides integrated occupancy and daylight harvesting for additional control and energy savings. Requiring no system re-wiring, SpaceWise technology is ideal for retrofit applications.
- Occupancy and daylight sensors are integral to each luminaire. Luminaires in large rooms and open plan areas are grouped together up to a maximum of 50 using a handheld remote so room lighting turns on at first sign of occupancy.
- Upon first entry, grouped luminaires brighten up gently to a background level. Once occupants arrive at their workstations, luminaires in the immediate area brighten up to full illumination and will dim down when no presence is detected. Grouped luminaires will dim to off when no presence is detected in the group.
- Daylight sensing is automatic and re-calibration occurs daily when luminaires turn on.
- The SpaceWise Accessory, when combined in the field with any standard 0-10 dimmable Evokit, will transform the kit into a SpaceWise-enabled retrofit kit. There are two variations of the accessory, one for the Evokit 2x4 and one for the Evokit 2x2.

Order Codes	Description
SWZ-REMOTE	SpaceWise handheld remote for grouping and configuration (at least one remote required for any SpaceWise installation)
UID8451/10	Wireless Dimmer Switch Selector
UID8461/10	Wireless Scene Selector
