

Light switches tips

Consider the switches Mark light switches in convenient locations on your floorplan and remember to pair them up with corresponding fixtures. **To vary the brightness of your lighting, consider using dimmer switches.**

Pairing switches To pair all your switches to their corresponding light sources, mark your first switch A and then mark all fixtures you want that switch to operate with an A also. Continue marking the remaining light sources to their functioning switch using alphabetical order, until all lights have an assigned switch.

Discuss your lighting plan Don't forget to discuss your lighting plan with your electrician for feasibility and proper installation. They may also have valuable tips for you to consider as you finalize your lighting plan.
