**Bringing
light and
ambience**
to your city

CitySoul gen2 LED

Lighting as versatile as your city

Your city has many different faces. To complement that versatility, Philips developed a new urban lighting product family: CitySoul gen2 LED.

This new range incorporates the latest insights and innovations in city lighting, while building upon the strengths of the previous CitySoul series. Designed to be used as a modular urban-lighting toolbox, the CitySoul gen2 LED range enables endless combinations - so you will always find the perfect solution for your city.

Designed to please

The elements in the CitySoul gen2 LED family are designed to work together seamlessly. There are different styles to choose from, each of which offers a discreet addition that will complement the look of your city's roads and open spaces. You can also adjust the lighting's softness to match the level of user comfort and the ambience you want.

Excellence in real-world applications

CitySoul gen2 LED offers best-in-class performance that complies with all relevant international regulations. This helps to make your city's lighting infrastructure as future-proof as possible, with individual elements that are easy to service and materials that are lightweight and durable. CitySoul gen2 LED is compatible with Philips CityTouch connected lighting system to easily and flexibly manage the city's public lighting infrastructure and significantly reduce all operational costs.

Bringing ambience to your city

In public spaces, people respond to the available lighting in different ways at different times and places. The new CitySoul gen2 LED street lights apply these insights to help you define an urban area's ambience and energy. With their pleasant round styling, they will blend perfectly into any city center.

New generation, new design

The popular, well-received CitySoul series has evolved into a new range: CitySoul gen2 LED. Its updated design has circular shapes that make the product instantly recognizable. With the abundance of circles already visible in our environment, CitySoul gen2 LED is a natural addition to a city as a modern habitat.

The styling is based on a round archetype with beautiful, flush transitions between spigot, luminaire and bracket. This makes CitySoul gen2 LED a complete and versatile urban lighting solution that is both elegant and discreet.

Light and luminaire become one

Our growing understanding of the effects of light on our wellbeing has informed a new generation of lighting designs for public spaces. But often the technology installed to produce this light is still packaged in a traditional, unattractive form.

With the introduction of CitySoul gen2 LED, you can take urban lighting to the next level. The boundary between natural and artificial light will blur and the street lights themselves will become a natural part of the cityscape.

Inspire and enhance your city

Easy urban integration

The CitySoul gen2 LED family is part of the Philips UrbanStyling approach: a modular range in which luminaires, brackets and poles work together as a unified design concept. With flush transitions and clean lines, CitySoul gen2 LED is a discreet, elegant fit for any urban context.

Comfort & ambience

With a specially designed LED board, diffusing tools and several light-color options, CitySoul gen2 LED does more than produce the required lighting levels. It adds a sense of comfort to city lighting and enhances the nighttime ambience.

Best-in-class performance

Excellence in urban lighting is all about state-of-the-art illumination and high energy savings. The CitySoul gen2 LED range is CityTouch compliant and applies the latest technology to enable sustainable, high-performance lighting solutions.

.....
Benefits
.....

Easy urban **integration**

Designed to match your city CitySoul gen2 LED is the most versatile urban street lighting family that Philips has yet designed. All elements in the CitySoul gen2 LED family were created by the same designer, to improve and maintain visual consistency throughout the range.

The discreet and understated design houses advanced technology that can cater to the needs of any urban environment. And a complete range of new application features have been added to the many existing solutions.

Three new brackets for different city areas have been added, including an elegant Lyre for more urban-focused applications and an Accent bracket that allows you to create the most elegant spiral configurations yet.

Applications

A high degree of flexibility

Dedicated to creating an appealing and comfortable atmosphere, the slim, discreet CitySoul gen2 LED range combines design consistency, a high level of lighting performance and a unique color signature. The full range is modular – from poles, brackets and luminaires to color effects – and therefore offers a high degree of flexibility, not only in terms of integration with the architectural context, but also in its range of applications.

CitySoul gen2 LED is part of our Urban Inspiration lighting portfolio. It incorporates all the necessary functional aspects of lighting whilst also having a strong focus on the emotional value of light. In this way, it helps to create the right ambience, enhance people's well-being, and make the city more livable. For every application we have a number of solutions that will inspire you and enhance your city, while also fulfilling all your specific requirements.

Traffic route

- Boulevard & avenue
- Main urban/access road
- Roundabout

City Center

- Boulevard & avenue
- Side street
- Square, park & playground
- Roundabout
- Cycle path & footpath
- Shopping & pedestrian area
- Parking area
- Public transport area

Residential area

- Residential street
- Cycle path & footpath
- Roundabout
- Square, park & playground
- Parking area

Right Curve bracket

With its slender shapes and silhouettes, the Right Curve bracket has an attractive aerial feeling that will integrate perfectly into classical environments.

Graphic bracket

Designed to reference traditional architectural steel frame structures, the Graphic bracket and CitySoul gen2 LED luminaire offer a modernized look of a typically industrial form factor.

East bracket

For modern areas and streets, the East bracket is a perfect fit. With its pure and lean shape, it gives neighborhoods a sophisticated and contemporary feel.

Lyre bracket

Any location where ambience lighting is needed to create a pleasant, comfortable atmosphere is the ideal setting for the Lyre bracket, the Lyre dedicated pole and the CitySoul gen2 LED luminaire.

UrbanWave bracket

A tubular curved shape that looks like a wave and will fit perfectly with CitySoul gen2 LED luminaires in contemporary urban settings.

Ocean curve pole

An elegant curved shape with an articulated interface dedicated to the luminaire and an optional LED top point to further highlight a major street's design signature.

Accent brackets and Ocean straight pole

A versatile and stylish solution that can feature up to 4 luminaires mounted in an attractive spiral configuration. The optional LED top point will highlight your environment's design signature at night.

Double post-top

This compact and straightforward design is the perfect solution for urban contexts in which performance lighting is the primary requisite.

.....

Nuance bracket

This stylish, curved bracket easily feels at home in a 21st-century city, while respecting and enhancing the esthetic appeal of neighborhoods that have a rich history.

Catenary

The Catenary bracket allows the CitySoul gen2 LED luminaire to fit into streets and on paths where de-cluttering is a necessity – like shopping districts and car-free zones.

Family range

The discreet CitySoul gen2 LED is the most versatile urban street lighting family designed by Philips to date. A complete range of new application features have been added to existing solutions, all designed by the same designer to maintain visual consistency.

These new additions include three new brackets for different urban areas, an elegant Lyre for more urban-focused applications, and an Accent bracket that allows you to create the most elegant spiral configurations yet.

Two versions

- A** CitySoul gen2 LED Mini
Has a smaller volume – a perfect match for lower heights.
- B** CitySoul gen2 LED Large
Lets you benefit from its larger volume in applications with mounting heights of up to 12 meters.

Suspended mountings

- A** Dedicated suspended mounting
For Ø 76 mm
- B** Catenary / Standard suspended mounting

Top mountings

A Post-top
 For Ø 60-76 mm

B Double post-top
 For Ø 60 mm

C MBA mounting
 For Ø 60-76 mm

D Lyre
 For Ø 60 mm

Direct mountings

- A** MBA wall mounting
- B** Accent
- C** MBA direct mounting

Side-entry mountings

- A** Standard side-entry mounting
 For Ø 42-60 mm
- B** MBA side-entry mounting
- C** Dedicated side-entry mounting

Dedicated sets

CitySoul gen2 LED comes with a wide choice of spigots, dedicated poles and brackets to fit different installation heights and application contexts. From catenary to post-top, from suspended to side-entry, CitySoul gen2 LED can provide it all. The range is equally suited for new installations and renovations, at any architectural scale.

- 1 CitySoul gen2 LED + Top bracket + wooden pole 5 m
- 2 CitySoul gen2 LED + Accent brackets + Ocean straight pole 7 m
- 3 CitySoul gen2 LED + Lyre bracket + dedicated Lyre pole 5 m
- 4 CitySoul gen2 LED + East single arm bracket + Accante 76 pole 7 m
- 5 CitySoul gen2 LED + Right Curve double arm bracket + Accante 76 pole 8 m
- 6 CitySoul gen2 LED + Right Curve single arm bracket + Accante 76 pole 6 m
- 7 CitySoul gen2 LED + double Post Top bracket + wooden pole 5m
- 8 Spiral configuration of CitySoul gen2 LED + Accent brackets + Ocean straight pole 7 m
- 9 CitySoul gen2 LED + Graphic brackets + Accante 76 poles
- 10 CitySoul gen2 LED + Ocean curved poles

Standard sets

In designing the CitySoul gen2 LED family, the aim was to provide maximum flexibility in applications. For example, the new range is fully compatible with all the existing brackets and poles from the first generation of CitySoul. Also, the new elements can be mounted on a variety of standard brackets.

- 1** CitySoul gen2 LED + Morph single arm bracket + Accante 76 pole 8 m
- 2** CitySoul gen2 LED + Jump single arm bracket + Accante 76 pole 5 m
- 3** CitySoul gen2 LED + Flip double arm bracket + Accante 76 pole 7 m
- 4** CitySoul gen2 LED + Flip single arm bracket and rear bracket + Accante 76 pole 5 m
- 5** CitySoul gen2 LED + UrbanWave single arm bracket + Accante pole 7 m
- 6** CitySoul gen2 LED + Sweep pole 6 m
- 7** CitySoul gen2 LED + Sweep pole 7 m
- 8** CitySoul gen2 LED + Azur single arm bracket + Accante pole 5 m
- 9** CitySoul gen2 LED + Nuance double arm bracket + Accante pole 7 m
- 10** CitySoul gen2 LED + Heritage single arm bracket + Accante pole 5 m

Comfort & ambience

More than just top performance

The CitySoul gen2 LED family is the standard when it comes to providing excellent lighting levels for city streets and squares. But it goes beyond that, creating a feeling of comfort or even a specific ambience to meet the needs of different urban areas.

Striking the right balance

In urban contexts, it is very important to find the optimal balance between performance

on the one hand, and comfort and ambience on the other. There are many factors that influence the equilibrium of comfort versus highest lighting efficacy - examples are: the installation height, the application's context and other aspects like the type and concentration of traffic participants.

If they look directly into the light, users can experience discomfort when they are exposed to high luminance levels. To avoid this and

enhance comfort, CitySoul gen2 LED offers a diffusing option that softens the light but still offers high lighting quality.

Alternatively, a result may be required with optimal efficacy and optimal optical performance. In such cases, CitySoul gen2 LED will use the clear glass option. This achieves the best light distribution, especially in combination with high-transmission lenses.

Standard glass

Frosted glass

Get smart with Intelligent White

CitySoul gen2 LED is the world's first urban lighting range to offer Intelligent White. This new and unique feature – which you can pre-program right into the luminaires – enables you to enhance the nighttime ambience of your city by changing the color temperature of the light, following the nighttime rhythm.

This is highly relevant to areas of a city where the occupancy changes over the course of the day, like squares and parks. Such changes in micro-local population density affect the flow of people and traffic, and the required relevant services, throughout the city.

It can be a great benefit, then, to use light as an inconspicuous means of effecting changes in ambience – which, in turn, influence where people go in your city. Intelligent White can be ordered according to your specifications with any standard pre-setting you prefer.

A city square at night

Example:

Lighting performance

Whatever the application, the CitySoul gen2 LED range is the versatile UrbanStyling toolbox for city planners and lighting designers. The product range offers a wealth of mounting possibilities and ensembles, and it has a lighting performance that will meet any city's needs.

A variety of optical distributions

To ensure optimal application flexibility, the CitySoul gen2 LED range includes six different optical distributions. These have been developed to match real-life situations that are common to most urban environments, ensuring that the users get optimized lighting in any situation.

In the overview below, you can see which distributions correspond with which street settings. The combinations are highly flexible and are suitable for a variety of applications. Examples are: roads in city centers and urban areas, residential streets, pedestrian areas, cycle lanes and parking areas.

DM Distribution Medium

- ME3 (to ME6) and CE class for road and street lighting

DW Distribution Wide

- ME3 (to ME6) and CE class for road and street lighting

DK Distribution Medium for wet road conditions

- MEW class for road lighting

S Distribution Symmetrical

- S class for area and square lighting

A Distribution Asymmetrical

- CE and S class for area and square lighting
- Only available for Large version

DRW Distribution Residential Wide

- P and S class for wide residential street lighting
- Improved Ev for face recognition and safety
- Only available for Mini version

CitySoul gen2 LED in control

Lighting city streets, roads and public spaces presents many challenges, partly because the dynamics of city life are changing constantly due to fluctuations in traffic density, etc.

This means you need the right level of lighting to respond to these changes in order to make the city feel safe, attractive and inviting. But at the same time you are under pressure to reduce energy costs and maximize your green credentials. Philips offers a complete range of intelligent lighting controls to help you overcome all these problems and make your city more livable and sustainable.

Connected lighting

CityTouch Ready luminaires

CitySoul gen2 LED can be seamlessly connected to CityTouch software via CityTouch connect app (remote management), with all the intelligence being integrated into the luminaire without the need for any additional hardware. Communication runs directly via the public mobile network. An additional advantage is that you are not required to perform any maintenance. Furthermore, the entire connectivity management is covered by the service we provide, ensuring there is no hassle for you, the customer. Once connected to the power

supply, a light point automatically appears on the CityTouch map at the right location - with all the relevant technical parameters imported into the system.

CityTouch connect app is an intelligent, interactive remote management solution for street lighting. It brings your city lighting to life and offers you flexibility, information and accuracy. The system's flexibility enables you to respond easily to expected and unexpected situations by dimming or brightening any of the areas within your city to ensure

safety and well-being. Information keeps you up to date on the current status of every single luminaire, facilitating more effective maintenance and faster repairs. And accurate energy metering gives you a precise overview of actual energy consumption.

CityTouch connect app key features

Control of each individual light point

You have the flexibility to adjust every single luminaire to changing situations or requirements at any time. You can adjust calendars to suit your individual needs simply by changing the switching points of each dimming profile via drag and drop.

Fault detection and notification

Faster and better provision of information about the current status of the lighting infrastructure enables you to address maintenance issues more quickly and to improve the maintenance service level.

Accurate energy metering

Accurate energy metering for each individual luminaire enables you to monitor your energy bills and to identify potential new savings.

Network controls

StarSense Wireless with RF antenna

StarSense Wireless is a networked control system based on two-way wireless communication using the latest RF mesh network technology. The system enables individual light points to be controlled remotely and to be managed via online platforms like CityTouch.

Lighting operators can control the outdoor lighting infrastructure remotely, setting dimming levels

to achieve considerable energy savings. Also, they get real-time feedback from the luminaires, reducing operating and maintenance costs via accurate scheduling of on-site maintenance service tasks, while improving both the quality and reliability of outdoor lighting.

Stand alone controls

LumiStep control

An integrated control system available in the Philips driver, which lowers the flux of the light source and power consumed over a period of 6 and 8 hours. The potential energy savings (on power system) are up to 25%, depending on the luminaires and light source used.

DynaDimmer control

An integrated control system included in each light point - operated on electronic equipment and can be integrated into the Philips driver. It can apply 5 levels of power, (re)definable on the level and duration, per chosen light point. An average energy saving of approximately 50% per year can be realized.
