

# PAXBPE

AntumbraButton Euro

Contemporary two-, four-, or six-button panel with light-wash effect

The Philips AntumbraButton user interface features a sleek, contemporary design and incorporates the latest in field effect technology. Each easy-to-press mechanical button can be customized with text or icons and programmed to perform a wide variety of local and site-wide control functions. The PABPE range is suitable for, but not limited to, European, Middle Eastern, African and Asian markets.

# PAXBPE

## Contemporary two-, four-, or six-button panel with light-wash effect

- **Field effect technology\*** – The user interface detects an approaching user and ‘wakes up’, initiating a wall-wash lighting effect to encourage interaction.
- **Supplied as two components** – The Application Module contains buttons, rim, base and mounting plate, which can be mixed and matched to suit décor. The Communication Module (DACM) contains logical and network functions and can be pre-programmed off-site, allowing commissioning to commence prior to finalizing rim and button options.
- **Hidden sensory inputs** – An internal light sensor measures ambient light and adjusts lightwash effect accordingly. A built-in temperature sensor automatically adjusts air conditioning when integrated into the system.
- **Multiple language and icon labeling** – Button labeling language choices include English, Chinese and Arabic. A library of common icons transcends language barriers, which is particularly useful in hospitality applications.
- **Décor-matching options** – Buttons and rims are available in a range of attractive polycarbonate and metallic finishes.
- **64-channel DMX Tx support** – Can be factory-set to DMX instead of DyNet, to communicate directly with DMX fixtures

## Dimensions

\* The mounting plate must be grounded to avoid field effect false triggering by nearby ungrounded metal objects.

# Specifications

Due to continuous improvements and innovations, specifications may change without notice.

# Application Module Ordering Code

The Application Module contains the buttons, rim, base and mounting plate. The buttons and rim are available in the range of finishes shown below. The base contains all the sensors and LED indicators. Sensitive components are enclosed by a rubber envelope to give an IP22 rating, allowing installation in high-condensation environments such as bathrooms. A metal mounting plate attaches the Antumbra panel securely to the wall, ensuring stable, reliable operation.

PA6BPE-BC-X

### Number of Buttons

- 6 = Six buttons
- 4 = Four buttons
- 2 = Two buttons

### Button Finish

- Corona (Polycarbonate)
- M = Magnesium
- S = Silver
- W = White
- Flare (Metallic)
- A = Aluminum
- G = Gold
- J = Jet
- N = Noir
- P = Prestige
- V = Vintage

### Rim Finish

- A = Aluminum
- C = Chrome
- M = Magnesium
- W = White

### Button Labeling

- L = Labeling
- X = No labeling

# Communication Module Ordering Code

The Communication Module is compatible with all interfaces across the Antumbra series, and can be ordered, programmed, installed, wired and tested without the Application Module attached. This allows the commissioning process to begin before the final finish options have been chosen, or during construction, and protects the Application Module from damage until the site is ready for occupancy.
