

CitySwan Bollard – stylish and discreet

CitySwan Bollard

Being part of the CitySwan family designed by Danish architects Bjarne Schläger and Morten Weeke Borup, the CitySwan Bollard has a stylish, discreet, graceful appearance. The luminaire provides downward functional surface light from high-performance LEDs with incredibly low energy consumption. It is made of dark grey die-cast aluminum, and the housing has a characteristic ellipsoid shape familiar from the CitySwan road luminaire. CitySwan Bollard comes with a choice of three different optical covers: a transparent flat cover for the slickest design, a convex transparent cover for a more elongated light distribution, and a flat, opal cover for optimum uniformity. Nominated for the German design award "Designpreis" in 2009 Danish Design Award 2010/2011 Design: Bjarne Schläger, light + architecture and Morten Weeke Borup, GHB Landskabsarkitekter A/S

Beneficii

- Elegant Danish design
- Energy-efficient

Caracteristici

- Provides functional lighting together with a nice design

Cerere

- Entrances
- Squares
- Sidewalks and bicycle and walking paths
