PHILIPS

Lighting

Sophisticated yet simple energy-efficient lighting control solutions

Dynalite Integration Devices

Within any modern project, many third-party systems can be found performing different roles. Each separate system may use a different protocol for communication. Dynalite has developed a range of gateway devices that can be used to synchronize these systems' functions into one integrated system solution.

Benefits

- By utilizing the correct gateway, different systems can be integrated, allowing end-users access to a fully automated site from one interface.
- By successfully integrating third-party systems with a Dynalite solution, repetitive end-user interaction is reduced.

Application

- Retail and Hospitality, Office and Industry
- Public spaces, Stadiums and multi-purpose Event Centers
- Residential
