

PHILIPS

Lighting

The ultimate in user interface solutions – balancing aesthetics and function

Dynalite User Interface

Regardless of the level of integration and range of available functions, a control system requires an intuitive end-user interface, so that users can easily schedule and activate the various control functionalities. Philips Dynalite user interfaces come in a broad range of panels, touchscreens and wiring devices – with a rich variety of styles and finishes to match any project budget, level of interactivity, or décor requirements.

Benefits

- User interfaces for automation systems from standard up to premium
- Fully customizable in terms of functions and aesthetics
- Flexibly programmable during and after commissioning

Dynalite User Interface

Features

- Wide choice of products for any application
- Ultimate in flexibility – various styles and finishes for consumer and commercial environments, full configurability and customization
- Wiring devices – many function types, aesthetic matching to control panels, modular design
- Panels – many different button layouts, custom engraving, programming settings within area
- Touchscreens – ultimate interactivity, intuitive thanks to custom-created screen interface, limitless décor-matching options
