# **PHILIPS** Lighting

## Metronomis LED – a play of light and shadow

### **Metronomis LED Poles**

Metronomis LED is the first post-top range in the world to offer a palette of environmental lighting effects to give projects a unique contextual or aesthetic touch. An innovative play of reflection, light and shadow creates an environmental pattern on the ground or on the bowl to create additional ambience. Four new iconic designs – with a visual and modular link to Metronomis I – are reduced to the essential elements. During the day, the discreet, transparent design blends into its context, be it contemporary or classical, while its night-time appearance is both functional and decorative. The flexible, modular Metronomis LED comes with a range of columns and a wide variety of optics and effects, enabling architects and lighting designers to create a unified, consistent lighting design that still reflects the differences in urban culture and history. Offers exceptional visual comfort while also optimizing safety

#### Benefits

- $\boldsymbol{\cdot}$  Pure design and palette of lighting effects to make your city unique
- $\boldsymbol{\cdot}$  Offers exceptional visual comfort while also optimizing safety
- Complete and innovative lighting solution with a shared design identity for both mast and luminaire
