

Provides peace of mind, ease of use and energy efficiency to your site.

SiteWise area lighting management system

Provide a sense of security for visitors while saving energy, adhering to local code requirements, and meeting your business objectives. Introducing Philips SiteWise, the complete area lighting management system featuring patented central dimming technology. SiteWise utilizes existing wiring, making installation and commissioning simple. An intuitive user interface makes it easy for users to set dimming schedules around the needs of your site.

Benefits

- SiteWise allows you to manage wall sconces, bollards, floodlights and arm-mounted luminaires under one simple control system.
- SiteWise allows you to easily schedule lighting for different times of day and levels of activity to maintain a sense of security.
- SiteWise allows you to achieve a quick 3-4 year payback through enhanced energy savings that meet your budget goals.
- SiteWise is a simple, out-of-the-box system with no re-wiring required so installation is not disruptive. Set-up is quick and easy, and you can operate almost immediately.
- SiteWise features an intuitive user interface that makes it easy for authorized users to set and update schedules based on your site's specific needs.

SiteWise area lighting management system

Features

- Delivers a patented control system that results in incremental energy savings.
- Features an intuitive user interface that can be accessed by authorized users via computer or tablet while on site.
- Offers reliable occupancy and time-based dimming scheduling.
- Allows to create up to 10 preset schedules and easily add pre-set lighting scenes to your schedule.
- Provides motion sensor overrides located on each luminaire, or over entries and exits.
- Uses existing cabling – no additional wiring required.
- Meets local regulations and energy code requirements.
