LLC1681/10 ActiLume Wireless 1-10V SB

The ActiLume Wireless 1-10 V system can work together with OccuSwitch Wireless devices. Wireless luminaires with the ActiLume Wireless 1-10 V system share occupancy information and switch off when all sensors detect no presence. The ActiLume 1-10 V sensor offers daylight savings to the connected wireless Switch Boxes. This daylight regulation is not shared over the wireless network. Within a wireless network it is possible to create various zones with wireless devices. Scenes can be created across these zones, and these can then be recalled using the wireless remote control.
