

Dynalite Sensors

DTS900

The Philips Dynalite sensor range combines motion detection, light level detection and IR receive in one unit. Each of these features can be operated at the same time, allowing automation scenarios such as turning on the lights after detecting motion and then dimming the lighting level once the available sunlight has been measured, thereby providing additional energy savings. By combining each of these functions into one device, operational efficiency is improved. Each sensor has an in-built microprocessor, allowing logical functions to control one small room, the floor of a building, or an entire building. All sensors receive their power from the DyNet network, and as they are fully remotely programmable, they can be configured to automate and control a virtually unlimited number of controlled outputs.

Product data

Product Data	
Order product name	DTS900
Full product name	DTS900
Full product code	871016350736100
Order code	913703072009
Material Nr. (12NC)	913703072009

Numerator - Quantity Per Pack	1
EAN/UPC - Product/Case	8710163507361
Numerator - Packs per outer box	1
EAN/UPC - Case	8710163507378
