

# Dynalite Sensors

## DTS900

DTS - 900

The Philips Dynalite sensor range combines motion detection, light level detection and IR receive in one unit. Each of these features can be operated at the same time, allowing automation scenarios such as turning on the lights after detecting motion and then dimming the lighting level once the available sunlight has been measured, thereby providing additional energy savings. By combining each of these functions into one device, operational efficiency is improved. Each sensor has an in-built microprocessor, allowing logical functions to control one small room, the floor of a building, or an entire building. All sensors receive their power from the DyNet network, and as they are fully remotely programmable, they can be configured to automate and control a virtually unlimited number of controlled outputs.

### Product data

General Information		Order code	
Type description	900	Order code	913703072009
Type number	DTS	Numerator – quantity per pack	1
Product Data		Numerator – packs per outer box	1
Full product code	871016350736100	Material no. (12NC)	913703072009
Order product name	DTS900	Net weight (piece)	0.550 kg
EAN/UPC – product	8710163507361
