

NEC digital cinema projectors

XDC 4002N

Digital Xenon Cinema N-type lamps are ideal for today's demanding 3D and 2D digital cinema presentations. They are especially designed for NEC projectors. There is a choice of three power ratings in the N-type Digital Cinema Xenon lamps range: 4000W, 4500W or 6000W. There is also a choice of three power ratings in the NH-type Digital Helios lamps range: 2000W, 300W, and 4200W. All these lamps produce the very high light output needed to maximize screen brightness and enhance the dramatic effect for the viewer. These long-life digital lamps also provide constant color temperature characteristics, and meet all of the stringent arc-stability requirements for consistent customer satisfaction. In addition to N-type Digital Cinema Xenon lamps there are B-, C-, S-, and TA-type Digital Cinema Xenon lamps. These are all individually customized per projector, so there is a different, perfect-fitting lamp for each projector model to ensure optimized projector performance.
