# Highlights

### Easy Installation

Battery-powered, no mains wire required. Quick and easy mounting with screws on the ceiling / wall or place on desk.

### Whole room control

The sensor is attached to a single room and triggers all lights in that room. You can move the sensor in the app if you want it to trigger lights in another room instead

### Works even without Wi-Fi

The sensor communicates directly to the WiZ lights. It works even when your Wi-Fi is down.

### Automate your light

You can set the lights to turn on / off or change light mode according to motion detection. It works with all WiZ Connected products

### Flexible setting

Set the lights to turn on a certain brightness or a specific mode such as nightlight, daylight. You can configure what happens when motion is no longer detected, and after how long

### Wide range detection

The detection range is as wide as 3 meters with a beam angle of 120 degree

### Trigger different light modes

" By setting Rhythms for the room in the WiZ app, you can make your sensor trigger different light modes at different times of the day"
