Top Product Features

- Proprietary LED platform that provides a soft, diffuse volume of pure white light.
- Fluorescent-like illumination while eliminating unsightly socket shadows.
- Low-maintenance design, reducing the hassle of luminaire upkeep.
- Multiple size options: available in 2x2, 2x4, and 1x4 configurations.
- Variety of lensing styles for design flexibility.
- Ideal for diverse architectural interiors, including offices, schools, and hospitals.

Notes (3) "T1" ceiling type is compatible with Metalux DF Series Drywall Frame Kits and Metalux Universal Surface Mount Kits, ordered separately from Metalux. For 1x4 drywall frame kit, order part #DF-14-W. For 1x4 surface mount kit, order part #SMK-14-W. Refer to the surface mount kit specification sheet for more information.	Notes (4) Must be used in conjunction with a DALI control system. For a complete listing of Fifth Light Technology products and other solutions from Cooper Lighting Solutions (5) 1x4: STP driver not available in Light Levels 1 and 2. (6) 1x4: LH/L5 driver not available in Light Level 1.	Notes (7) Unless noted otherwise, integral emergency battery pack is 14W maximum, 90 minute output. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 14=1400 lumens)	Notes

Product Specifications

Construction

- Low profile 3-3/4" housing constructed of die-formed 20 gauge cold rolled steel with integral 20 gauge gear tray. High reflectance sheet metal internal reflectors can be removed for easy access to driver compartment from below ceiling plenum. Fixture weight: 14.0 lbs.

Shielding

- High light transmission curved frosted prismatic acrylic lens with UV inhibitors minimizes lamp image and LED pixilation. Perf patterns and nano-prismatic are available as additional aesthetic options. Perf available in round or rectangular pattern via internal frosted acrylic inlay and smooth clear acrylic lens. Nano-prismatic inlay is a high light transmission material offering additional brightness mitigation with smooth acrylic lens. Lenses secured to housing via injection molded inserts for easy access to light engine.

Finish

- Fixture housing is high reflectance white using electrostatically applied polyester powder coat paint for durability and luminous uniformity.

Electrical

- Long-life LED system coupled with electrical driver to deliver optimal performance. Projected life is 60,000 hours at 87% lumen output. LEDs are available in 3000K, 3500K or 4000K with a typical CRI ≤ 85 . Standard drivers are 0-10 volt continuous dimming that work with any 0-10V control/dimmer. Or, specify Digital Addressable Lighting Interface (DALI) drivers; for use with Fifth Light controls. See ordering information for details.

Mounting

- Universal flange design works with most lay-in ceiling types. Integral pry-out tabs secure luminaire to ceiling grid from above. Fixture offers tie-in locations for tie-wire on all corners. Consult local code for appropriate tie-wire recommendations. See Technical Notes section for drywall frame kit and surface mount kit options.

Compliance

- Components are UL recognized and luminaires are cULus listed for 25°C ambient environments, damp location listed, and RoHS compliant.

Warranty

- Five year limited warranty
