LED Drivers

Advance Express

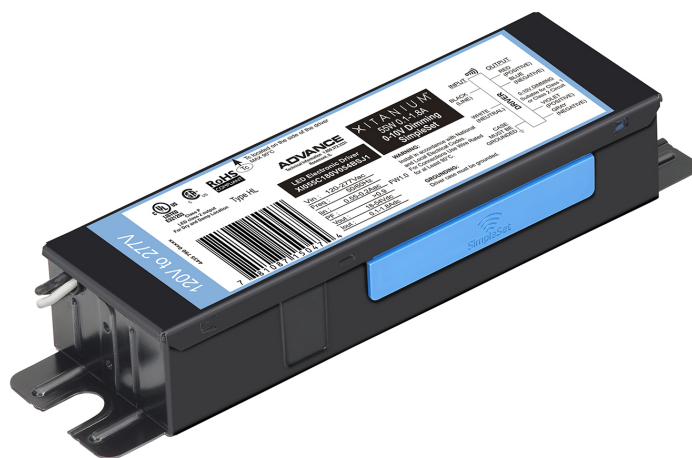

A simple solution for replaceable LED Drivers!

Advance, one of the most trusted brands in ballasts, now offers you a solution for LED Drivers. Visit your local authorized Advance distributor and let them guide you to a fast driver match!

The **Advance Express Programmable Driver System** offers a simple and fast solution for replacement drivers in existing linear, outdoor and downlight type LED fixtures. Seven recommended SKUs will replace an estimated 80% of commercial lighting driver applications. Additional sku's to cover less common application such as 347, 480, and niche current/voltage combinations are also available.

The **MultiOne Express Software Program** is designed for ease of use by the distributor to program your replacement LED driver in under a minute. The MultiOne Express software is compatible with printers, allowing printing of NEMA recommended labels for future ease of replacement and programming.

Bring your failed driver and talk to your local Advance distributor today for quick and easy replacement! The two labels found on the failed driver should provide all the information needed for UL and its programmed parameters which makes choosing the correct Advance Express driver easy.

Talk to your local Advance distributor and ask for Advance Express today, or visit www.signify.com/AdvanceExpress for more information.
