

Removability Introduction

Disposal at End of Life

Light source reference control setting

Composition Explanation – Wiz Fairy Light

A. Composition Explanation

Control gear

Switch cover

Switch

Switch housing

Connector

Connector2

Light source:

- LED
- Silicon tube
- tape

Removability Introduction on Disposal at End of Life

Composition Explanation – Wiz Fairy Light

B. Steps to remove the components

Type: without permanent damage
Recommendation on disposal
Plastic part: reuse and recycling
Electrical part: disposal
Metal part: recycling

Removability Introduction on Disposal at End of Life

Composition Explanation – Wiz Fairy Light

C. Setup the test

Not-cuttable

D. Reference control setting

RGB strip is decorative purpose product, it is not intended to produce white color light, it is possibly to generate the white color light in someway, to get the RCS of light source, the possible way to find the RCS CCT point (non-preset point) by:

- To open WiZ APP → Connect the light strip to WiZ App → Custom → find the proper test color point → start the test

For the test point, you are suggested to find the CCT point in the white circle area
