

Inspired design, **ultimate control**

Beautiful interface solutions with user friendly functionality for every interior

Antumbra Series

The stunning Antumbra range has a surprising number of features, packaged in a choice of three designs that redefine the concept of minimalist chic. When you first encounter Antumbra, it detects your body's own electrical field and wakes up with a striking wall-wash lighting effect. With its array of inbuilt features, the Antumbra range offers an unparalleled balance of form and function.

The innovative use of **field effect technology** allows the keypad to automatically detect your presence by your body's own electrical field.

A **wall-wash lighting effect** is triggered when approached, to welcome interaction. The built-in light sensor detects ambient light levels and ensures the wall-wash effect activates at a comfortable brightness level.

Each keypad contains an **integrated temperature sensor**, allowing temperature monitoring at different locations throughout a building and obviating the need for third-party BMS or HVAC sensors and controls.

Designed in two halves, the communication and application modules enable the keypad **to be installed in two stages**, without the need for further programming when the fascia is installed.

Labeling for the Antumbra keypads is available in a **choice of Arabic, Chinese, English, Hebrew, Japanese and Korean** with font size options. An additional library of icons has been created to give a visual representation of button functions that transcends language barriers.

All indicators and sensors are completely hidden, giving a **smooth streamlined finish**.

A selection of rim and fascia finish options is available for each Antumbra keypad. These can be mixed and matched to suit.

AntumbraButton

The AntumbraButton range has large mechanical buttons available in 2, 4 or 6 button variants. Different finish options are available for the fascia and rim of the keypad – all color options can be mixed and matched. Customized labeling of text and icons can be added.

Custom keypads

Build a custom keypad to meet your needs; choose from a multitude of button sizes, colors and layouts; key switches to lock-out unauthorized use, and network sockets for connection to the Dynalite lighting control and home automation network.

Optional features

Vast range of optional features can be ordered, including displays, key switches, engraving and sockets for unique control solutions.

Fascia finishes

Extensive range of materials providing unlimited décor matching possibilities.

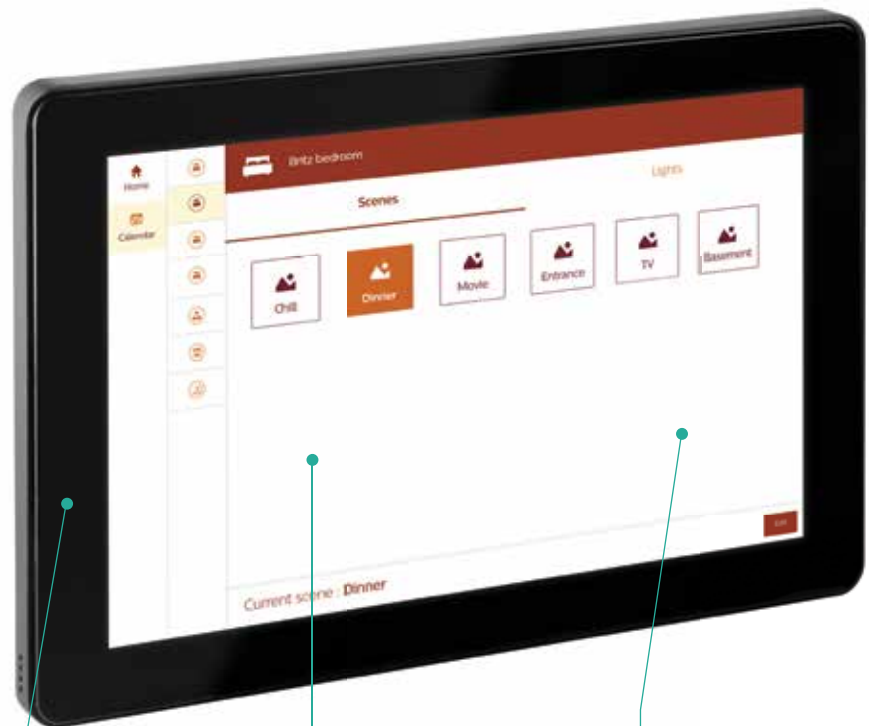

Button and fascia engraving

Clearly labeled button functions ensuring intuitive system operation.

Color Touchscreen

The Dynalite Color Touchscreen adds a new dimension of control. The touchscreen supports a range of sensing features that provide end-users with the ultimate in automation system interaction. The screen interface can be customized to control all automation elements from one location.

Fascia finish

Black Borosilicate Glass

Fascia color matches AntumbraTouch (black) and Revolution keypads.

Touchscreen features:

- Intuitive controls
- Built-in time clock
- Temperature and humidity sensor
- Proximity sensor with halo response

Intuitive floor plans and sliders can be displayed for easy user navigation.

Apps

The new Dynalite control app has a simple streamlined interface that delivers intuitive automated control into the hands of the end-user.

DynamicTouch offers a completely tailored solution for customers who want a unique and finely tuned bespoke user interface for their office or home.

EnvisionTouch comfortably exceeds most clients' smart home control requirements and runs on both Android and iOS.

Other software user interface options.

For small to medium businesses, the Philips Dynalite Ethernet Gateway provides a customizable browser based interface.

For larger enterprises, Philips Dynalite System Manager provides multi-user site-wide access.

Dynalite control app

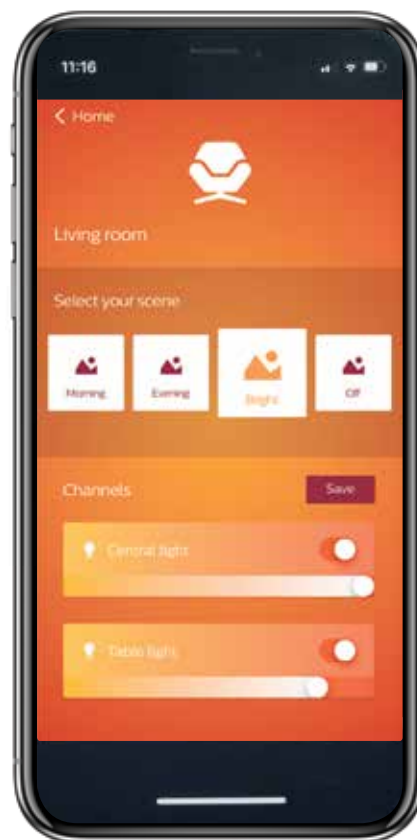

The new Philips Dynalite control app is available for iOS. It provides portable control of the Philips Dynalite system in both residential and commercial applications. Wrapped in a modern and intuitive user interface, this app allows users to manage scenes, control individual channels and apply schedules.

Plug-and-play - Connect the app to the Philips Dynalite system and it's ready to use.

Scene management - Recall and edit pre-defined lighting scenes and control individual lighting channels.

Scene scheduling - Trigger lighting scenes based on a schedule.

Simple connection - Connect to the PDEG - Philips Dynalite Ethernet Gateway, through your local Wi-Fi network.

iPhone with Dynalite Control
– an intuitive automated control app.

DynamicTouch

Available for Apple devices only.

Fully customizable app for home or commercial control.

iPhone with DynamicTouch
– a totally customizable app.

EnvisionTouch

Available in two versions: iOS for Apple devices; and Android.

Self-configuring application with standardized templates and functionality to speed up and simplify commissioning & installation processes.

Android phone with EnvisionTouch
– a self configuring app.
