

PHILIPS

FlexBlend Elite

interact ready.

Future ready your business with **smart office lighting**

Explore the benefits of FlexBlend

Today, next to efficiency and good payback, it's also important to ensure ceilings remain decluttered and lighting needs to offer both flexibility and compliance with norms and regulations. Offering real value for money, FlexBlend luminaires tick all these boxes.

Why choose FlexBlend?

- ✓ **Office-compliant lighting**
High-quality office-compliant lighting: Office Compliant Optics UGR <19. Minimised flickering and strobe light effects and increase visual comfort in the workplace.
- ✓ **Application flexibility**
The FlexBlend luminaire fits into every office area, from reception and corridors to open plan offices and meeting rooms. It is available in square and rectangular forms. Suitable for recessed, surface or suspended applications.
- ✓ **Adaptability in design**
This gives the possibility to install the luminaires easily in the field, at any moment. Even when today's luminaire is suspended, tomorrow this can be adapted to a surface mounted installation at the venue. And the other way around.
- ✓ **Fast return on investment**
By combining the benefits of good efficiency (up to 144 lm/W), reliability and long service time, ease of installation and maintenance, FlexBlend offers a great return on your investment.
- ✓ **Easy connection to IoT**
Lighting controls play an important part in providing complete office lighting solutions. Signify is able to offer both Wireless and Wired scalable solutions such as Dali and Zigbee connectivity. See page 7 for more information.

- Up to 144lm/W Efficacy
- L75 @ 100,000hrs
• L80 @ 70,000hrs
• L85 @ 50,000hrs
- Dali
• Connected Interact Pro
- CRI 90 / R9 >50
• COI compliant
- Surface / Suspended & Recessed mount
- Standalone or continuous line

Meeting Rooms

Breakout and Reception Areas

Different optical concepts to cover different needs

When it comes to designing office luminaires, we have one over-riding objective: the luminaires must deliver lighting of the highest possible quality.

For us, quality lighting means lighting that is fully compliant with all office norms and that delivers a comfortable working experience for office employees. Offering three optic concepts, FlexBlend luminaires deliver an above-standard quality of light for primary and secondary office areas.

Office-compliant **Polycarbonate Textured Structure (PCS)** optic has a distinctive bright line exit window appearance. With UGR <19 it meets the application requirements for all the primary office areas such as cell office, meeting room and open place office. Efficacy: lm/W up to 144.

Office-compliant **Micro Lens Optics (MLO)** has a soft sparkle exit window appearance and an outstanding look and feel. Micro Lens Optics due to their smooth light output and excellent quality of light are suitable for the most demanding application areas of every office. Efficacy: lm/W up to 105.

Non office-compliant **Opal (O)** optic has a soft gradient exit window appearance. With UGR <25 it fits in every secondary office area, such as corridors, reception and circulation areas. Efficacy: lm/W up to 125.

FlexBlend surface
mounted & FlexBlend
suspended

Full Application flexibility

FlexBlend is offered in both linear and as standalone, using the same lighting module. This gives the option to the users to use FlexBlend as standalone now, and tomorrow as lines.

Surface mounted stand alone

Suspended stand alone

Suspended lines

Corridor and Circulation Areas

FlexBlend recessed

Full Application flexibility

Are you looking for a square or rectangular luminaire for your workplace? Would you like to be able to use the same luminaire model in different rooms with different ceiling types? FlexBlend provides the required flexibility by being easy applied on different ceiling types as well as in different office spaces like open office or meeting rooms.

Square version

Rectangular version

Visible profile ceiling version (VPC)

Concealed profile ceiling version (CPC)

Plaster ceiling version (PCV)

Applications

FlexBlend is intended to be used in office buildings, covering more areas.

Working areas, where office compliancy is the key requirement

- Cell office
- Meeting rooms
- Offices with exposed ceilings
- Open space

Non-Working areas, where the lighting design must fit in the building design

- Reception area
- Corridors
- Circulation area

FlexBlend Suspended

FlexBlend Surface Mounted

FlexBlend Recessed

What to consider when selecting office lighting

In some respects, office lighting is working optimally when it's not noticed. This is when it provides consistent, high quality illumination of the office without causing discomfort or any annoying or undesirable effects. Here are some aspects of office lighting that ensure a healthy, enjoyable, comfortable, productive and even cost-efficient working environment.

Constant Light Output through lifetime

Like all light sources, LED depreciates over time. When power is constant, luminaires will deliver less light at the end of their lifetime than at the start. Constant Light Output involves dimming the light at the start (and using less power) and over time increasing the power to correct for the depreciation. The result is that over the full lifetime of the LED luminaire, its light output will remain constant.

Eliminating all types of glare

The unwanted effects of overly bright light sources on desks, screens or working areas are all too commonly experienced. Office-compliant lighting is required to eliminate direct and indirect glare; elimination of overhead glare is more of a recommended feature.

Reducing flicker and stroboscopic effects

Flicker and stroboscopic effects are associated with a rapidly fluctuating light source. They may lead to undesired effects for office workers such as annoyance, fatigue, headache or reduced performance. By helping you select the right equipment and components to reduce current fluctuations, we can ensure that flicker and stroboscopic effects are kept within acceptable limits.

Control Options

Dali

A reliable Dali Driver is supplied standard with the FlexBlend luminaires to provide stable lumen output and light quality that lighting specifiers and architects demand. The dimming range is between 1-100% and the driver interfaces with DALI and Touch & Dim control systems.

Lighting control made easy with Dynalite

The Philips Dynalite control platform benefits from 30 years of experience in delivering superior lighting control solutions. Dynalite manages all DALI luminaires, Tunable White recipes to create better environments, and occupancy strategies to maximise the efficiency of workspaces. This takes place seamlessly through multiple control components and the distributed intelligence defining relationships within the system architecture. Reporting and monitoring of the network via Dynalite System Manager software not only provides insights into the operation but also DALI reporting – giving the client the necessary tools to effectively manage the intelligent building.

Tunable WHITE (Dali 208/209)

Human Centric Lighting can lead to enhanced concentration and increased productivity. When indoor lighting is matching natural circadian rhythms, this can enhance a sense of well-being, and Melanopic Light can be shown to improve sleep patterns. The CCT range is (2700°k to 6500°k). The Tunable White concepts are set to revolutionize the way we work.

interact Pro scalable system

Connectivity is everything...it is everywhere...it is the future

Interact Pro scalable system allows you to safeguard your day 1 investment and scales up easily with your growing business needs, all without reworking your luminaires.

- Truly straightforward
- No restrictions on light points or building size
- Just add a gateway anytime and unlock more capabilities
- No need to change or swap sensors

GENERAL

Colour Temperature	3000K & 4000K
Mounting (suspended & surface)	Stand-alone & Continuous Line , Suspended option supplied with 1.5M drop wires and ceiling connection box
Input Voltage	220-240V
Electrical Class	I
Driver Type	PSD-Dali , WIA-Wireless, SR-System Ready
Driver Lifetime	100,000hrs
Electrical Connection	1.5m 5core pre-wired flex for Suspended option only, PIP (Push-In Connection) for Surface Mount and Recessed
Lumen Maintanance	100,000hrs L75,70,000hrs L80, 50,000hrs L85 (based on TM21 calculation)
SDCM	3
CRI	CRI90(R9 is equal to or greater than 50, Cyanosis Observation Compliant
IP Rating	IP20
UGR Rating	UGR19
Material	Steel Frame, Micro Prisms front lens
Finish	White (RAL 9003) , Silver (RAL 9006) , Black RAL 9004)
Warranty	5 Years

Flicker free

Philips Office Elite Products utilise industry best LED drivers that deliver flicker¹ free performance and no stroboscopic effect².

¹ Additionally the Dali standard specifies 8 bit (256 discrete light levels) that can introduce the appearance of Flicker during transitions (dynamic dimming).

Dimming performance is improved with Elite Luminaires by the addition of further bits totalling 32,000 (15bit). These interpolated dimming levels protect against flicker artefacts during light level transitions.

² In the absence of compulsory standards Philips Lighting opted to use the accepted test methods according to IEC TR 61547-1 [1] (Flicker) and IEC TR 61547-1 [5] (Stroboscopic Effect) with the following limits: PstLM ≤ 0.5 and SVM ≤ 1.

FlexBlend recessed

Lumen package:

2800/3600/4200 lm

Efficacy and optics:

- Office-compliant PCS up to 144 lm/W
- Office-compliant MLO up to 105 lm/W
- Non Office-compliant O up to 126 lm/W

Color rendering & color temperature:

- 930 and 940
- Saturated Red (R9) >50
- Cyanosis Observation Compliant

Housing height:

- Max 65-110mm
(depends on size and connector)

Lumen maintenance:

- L75 @ 100,000hrs
(based on TM21 Calculation)

Archetypes:

- Square
- Rectangular

Dimensions:

- 600x600mm
- 300x1200mm
- 150x1200mm

Control systems:

- PSD-Dali
- Interact Pro Scalable

FlexBlend surface mounted

Lumen package:

- For 1.2m variant:
2100/ 2800/ 3600/ 4000/ 4200 lm
- For 1.5m variant:
2600/ 3500/ 4500/ 5000/ 5200 lm

Efficacy and optics:

- Office-compliant PCS up to 140 lm/W
- Office-compliant MLO up to 105 lm/W
- Non Office-compliant O up to 126 lm/W

Color rendering & color temperature:

- 930 and 940
- Saturated Red (R9) >50
- Cyanosis Observation Compliant

Housing height:

- 73mm

Lumen maintenance:

- L75 @ 100,000hrs
(based on TM21 Calculation)

Dimensions:

- 200X1200mm
- 200X1470mm

Archetypes:

- Rectangular

Control systems:

- Dali
- Interact Pro Scalable

FlexBlend suspended

Lumen package:

- For 1.2m variant Direct light: 2100/ 2800/ 3600/ 4000/ 4200 lm
- For 1.5m variant Direct light: 2600/ 3500/ 4500/ 5000/ 5200 lm
- For 1.2m variant Direct/ Indirect light: 2800/ 3600/ 4800/ 5200/ 5600 lm
- For 1.5m variant Direct/ Indirect light: 3500/ 4500/ 6000/ 6600/ 7000 lm

Housing height:

- 73mm

Lumen maintenance:

- L75 @ 100,000hrs (based on TM21 Calculation)

Dimensions:

- 200X1200mm
- 200X1470mm

Archetypes:

- Rectangular

Control systems:

- Dali
- Interact Pro Scalable

Efficacy and optics:

- Office-compliant PCS up to 140 lm/W
- Office-compliant MLO up to 105 lm/W
- Non Office-compliant O up to 126 lm/W

Color rendering & color temperature:

- 930 and 940 Saturated Red (R9) >50
- Cyanosis Observation Compliant
