Icons

Scene Switch

One luminaire, three settings. Works with your existing switch and withouth a dimmer. You can change light brightness or light color with your exisiting wall switch.

Light source not included

Integrated LED light source

LED retrofit lamp included

Interlaced optics

Soft and uniform light which brings more comfort to your eyes, and cleverly redistributes light for less glaring.

Dimmable

You can set the light brightness with a wall dimmer. Make sure that your wall dimmer works with our luminaire: https://www.lighting.philips.co.uk/consumer/documentation-and-downloads

WarmGlow

The more you dim the warmer the light. You can set the light brightness and color with a wall dimmer. Make sure that your wall dimmer works with our luminaire: https://www.lighting.philips.co.uk/consumer/documentation-and-downloads

Bathroom luminaires

A range of products with higher water Ingress Protection. Bathroom luminaires are sealed tight to keep out moisture for a completely safe and well-lit bathroom.

Motion sensor

Detects the movement, switches the lights on when the movement is recognised.

Outdoor luminaires

A range of products with higher water Ingress Protection. Outdoor luminaires are sealed tight to keep out moisture and dust for a completely safe and well-lit garden or patio.

Remote control included

Portable

Portable lamp with rechargeable battery. USB cable included.

EyeComfort*

Switch to light that's easy on your eyes. Philips LED lights are designed to be **easy on your eyes.** That is what you can expect from a trusted brand.

What are the benefits of EyeComfort?

Our LEDs all conform to our EyeComfort standard, which measures our products against a set of key comfort criteria: flicker, glare, stroboscopic effect, photobiological safety, color rendering, dimmable, tunning - factors that can impact the comfort of our eyes.

* Designed for the comfort of your eyes. Visit philips.com/eyecomfort for flicker, strobe and other EyeComfort criteria and product details.

Photobiological safety

Concerning photobiological safety, our LEDs are not different from traditional incandescent lamps. They do not contain higher amounts of short wavelength light which can cause blue light hazard and fall well within safety standards.

Color rendering

Color rendering refers to how well a light source renders color. EyeComfort LEDs have a high Color Rendering Index, meaning that your home's furnishings appear in high definition and true color.

Dimmable

Some 'dimmable' LEDs of lower quality tend to flicker when you turn the light down. Our EyeComfort LEDs use smart electronic design so that you can create the perfect ambiance and enjoy a gentle solution for your eyes.

Glare

Some LEDs give off glare, where it is difficult to see due to the brightness of the light. This could cause visual discomfort and even headaches.

EyeComfort LEDs are designed to reduce glare, ensuring complete comfort for the eyes in every room of your home. For some luminaires we also adapted 'interlaced optics' feature ensuring uniformity of light distribution and its correct difusion so it's easy at the eyes.

Flicker and Strobe

Some LEDs may appear to flicker or produce a stroboscopic effect. This could cause distraction, irritation and affect certain health conditions.

EyeComfort LEDs are designed to minimize the factors that cause these effects, ensuring complete comfort for the eyes whether you're reading, working or relaxing.

High quality **LED light** designed to last for years

Our LED luminaires give optimal light output thanks to the included high quality, instant start LED light with 2700K and up to 90 percent CRI. Luminaires offer light in a range of colour temperatures (2200 - 6500 K), it's what makes light feel 'warm' or 'cool'.

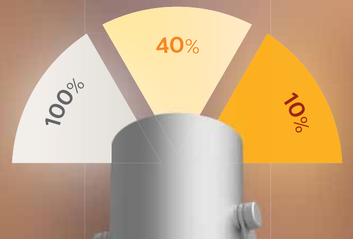

They are energy saving and have a long lifetime of up to 15 years, saving consumers both energy and money.

One luminaire. **Your switch.** Three light settings.

Works with your existing light switch on the wall

Sometimes, you feel like changing the ambiance in a room to match different daily activities. With the Philips SceneSwitch LED luminaires, you can easily change the light setting with your existing light switch on the wall. No dimmer or additional installation is required.

The more you dim
the warmer the light

Philips introduces the WarmGlow range – a series of LED luminaires that take LED dimming to a new level by delivering warm white light that creates a cozy, relaxing atmosphere. As the light is dimmed, its tone gets warmer. On top of this, Philips WarmGlow luminaries are compatible with more than 80 percent of the dimmers on the market.

20% light intensity
(2200K)

100% light intensity

WarmGlow dimming

Regular dimming

Plastic-free eco packaging

We are actively working to reduce the environmental impact of our products. As proof of this commitment, all consumer packaging is plastic-free and is made from 80% recycled paper. All the luminaires in this catalogue are supplied in cardboard boxes. That brings eco-friendly design, improves communication, and makes differentiating each of the ranges easier.

Build-on spots

Whether people need an accent light to highlight a key feature of their home, bright white light for activities like cooking or reading, or a warm dimmed light for relaxation and socializing, Philips spots provide the perfect light for every task and mood.

We have the most complete and comprehensive portfolio of spots which is both built around people's lighting needs and design preferences. Our portfolio covers the basic functional lighting needs for practical everyday use as well as it offers modern and timeless designs that help create the right light experience for any home.

Recessed downlights & spots

Traditionally, recessed lighting has had a functional role. However, recessed downlights and spots can provide much more than general illumination and directional lighting. They can create a warm and cozy atmosphere as well as enhance the interior design of our homes.

Whether you need a brilliant accent light to highlight a special area of their home, a steady reading light, or a gentle relaxing glow, Philips recessed downlights and spots provide the perfect light output and color temperature for every activity and mood.

Ceiling

The living room is the heart of any home – a place where families gather to relax and socialize with loved ones. And the bedroom is where we retreat to rest, relax, and recharge out batteries. Lighting for the living- and bedroom needs to be versatile, flexible, and easy to adjust to our different needs throughout the day. Careful placement of different light sources and playing around with light layering help to create a nice and welcoming atmosphere in a room.

Philips ceiling lights with the SceneSwitch technology are classic luminaries that fit into any interior and, at the same time, provide high-quality, energy efficient and long-lasting light. You can dim your light and choose your desired brightness for different moods with your existing wall switch.

Battens

Philips batten lights combine performance and design. With long-life LED technology and up to 20,000 hours usage, these lights are the ideal replacement of the traditional T5 battens. The battens allow you to customize your illumination angle for greater convenience.

The sleek and simple design fits well into most homes and makes for a perfect wall application your kitchen, garage, or utility room to add strong lighting to the space.

Lightstrips

Philips lightstrips let you capture any moment with light and color.
They can be placed anywhere and sticked to any surface, meaning you can get lighting literally anywhere in your home. Place them along panels, behind furniture, and under your kitchen counter, shelves, and cupboards.

Use light and color in your home in a new way. The elegant, flexible design combined with LED-based technology gives you lighting that sets the right atmosphere and lets you enjoy every room, mood, and occasion in your home.

Bathroom

Philips bathroom luminaires are specially designed for humid environments, and they have been tested rigorously to ensure water resistance. The lights meet all the lighting needs you may have for your daily routines in the bathroom. Early morning hours call for precision and concentration in front of the mirror. With finely tuned bright light, you can go through your morning rituals with ease, whether it is to give your make-up a perfect finish or to groom your beard neatly.

The IP level consists of two figures: the first one refers to the protection level against dust, the second against water.

Bathroom luminaires are sealed tight to keep out moisture for a completely safe and well-lit bathroom. The IP rate identifes the Ingress Protection against humidity and dust. Only luminaires with an IP higher or equal to IP44 are suitable for bathroom.

Portable light

Our portable lights are suitable for multiple applications. Easy to use and rechargeable via USB port lamps can be taken anywhere. Particularly noteworthy are desk lamps – with its robust design and optimal performance desk light is the perfect luminaire that brings quality and brightness to any home space. It also provides comfortable light for the working environment. You might want to choose a desk lamp with a flexible arm that can be adjusted to optimally illuminate your desk space. All of our portable luminaires are dimmable, some of them are even tunable. That enables you to create the right mood for the moment and can reduce the tiredness of your eyes. You can now work, study, read your favorite book, or do your makeup with a perfectly fitted light.
