Buy American Act

BAA Product Offering · March 2022
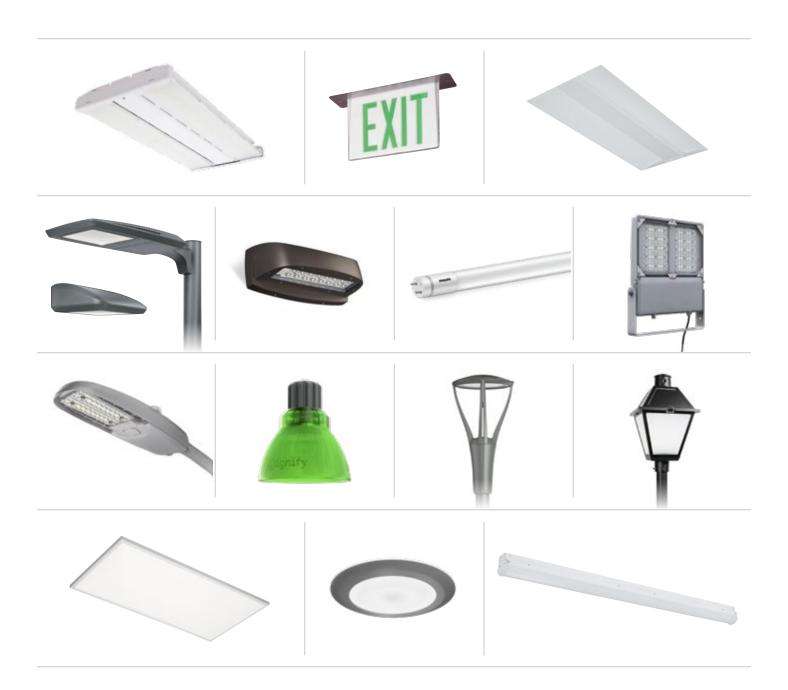

Buy American for your lighting project!

The Buy American Act of 1933 (BAA) restricts the Federal government from purchasing non-domestic goods by establishing a preference for "domestic end products" and "domestic construction materials". Generally, the BAA applies to Federal acquisitions that exceed the micro-purchase threshold and that are below the applicable dollar threshold for Trade Agreement Act (TAA) applicability.*

The BAA applies to a wide variety of Federal projects, including infrastructure projects. Lighting is a critical piece of that infrastructure. This Product Guide features a list of Signify lighting products to meet your project's BAA requirements. Signify may offer other products that are BAA-compliant. If you are interested in a BAA-compliant product that does not appear in this Project Guide, please contact Signify for availability.

* All domestic preference information provided herein is for general informational purposes only. This document contains a high level overview and may omit certain important qualifications or conditions in the interests of simplicity. This document does not address the (i) applicability of, or availability of a waiver under, the TAA, or (ii) "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies. Information provided herein is not legal advice and should not be relied upon as such for any purpose. The recipient of the funding, rather than Signify, has the ultimate responsibility of identifying the applicable domestic preference requirement, e.g., BAA, TAA or Buy America. The applicable requirement is typically identified in the RFP/project documentation. Please consult with your own legal counsel with respect to any questions you may have.
