Robert Bosch Group HQ

Warsaw, Poland

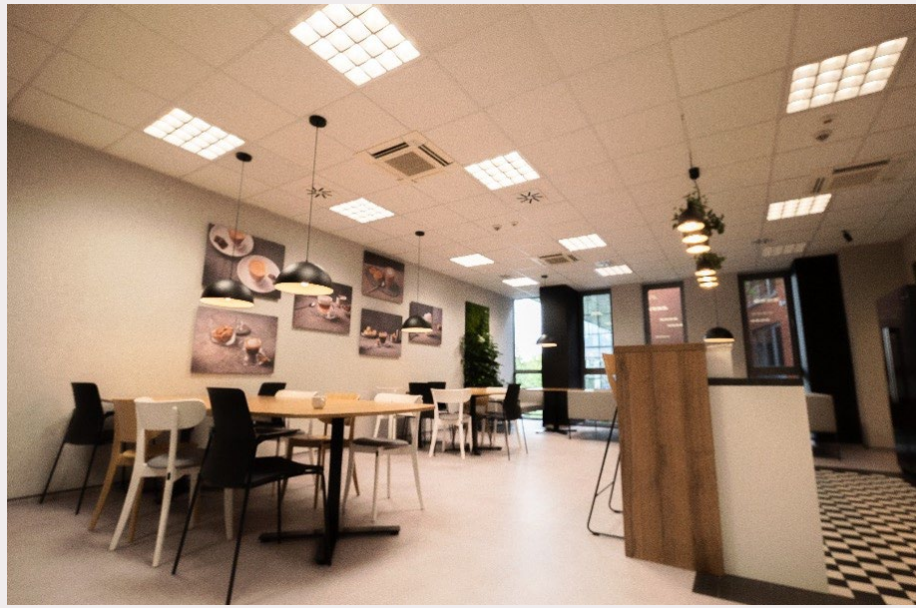

Modernization

The team completed a complex modernization of Robert Bosch HQ's lighting in Warsaw, which included the installation of an Interact Office Enterprise system in the offices, canteen, corridors, and common areas. Some luminaires were installed, while other existing ones were adapted. Additional control buttons were installed in some of the conference rooms, as well as UV-C luminaires and a Trulifi system.

Next stage

In total, 1,400 luminaires were installed, including 720 units of Philips PowerBalance.

The next stage of cooperation will be the illumination of the office building with Color Kinetics VayaTube luminaires, together with an Interact Landmark control system.
