MultiOne Mobile

Smartphones requirements

The MultiOne Mobile App is intended for use of smartphones with Android operating system.
In case the internal NFC of the phone is used, please refer to the manual of the phone to find the position of the internal NFC antenna.
The App can also be used in combination with the external LCN9810 SimpleSet NFC scanner. For the external NFC scanner, the phone should support Bluetooth.

Minimum requirements:
• Android 10 or newer
• Bluetooth 4.2 or newer

Recommended requirements:
• Android 12 or newer
• Bluetooth 5 or newer

The list of smartphone types in the market is long and increasing. System performance can vary for different combinations of the operating system, version of the Bluetooth device and how it is implemented in the phone model. Alterations from industry can have an impact too. Therefore, although we expect good performance in most cases, Signify does not guarantee expected performance of MultiOne Mobile App.
It is recommended to test your smartphone with the MultiOne Mobile App.

• tablets have not been tested.
