

# Energy Management Policy

**Subject:** Energy Management Policy

## Introduction

At Signify we are committed to the efficient use of energy, reducing our environmental impact, and continually improving our energy performance. This Energy Management Policy outlines our dedication to implementing an Energy Management System in accordance with ISO 50001 requirements. By adhering to this policy, we aim to drive energy efficiency, promote sustainable practices, and enhance our overall environmental performance.

Initially this Policy will apply to all organizations that are part of Operation Digital Solutions in Europe and will be extended to include a broader range of Signify organizations in the near future. It covers all employees, temporary workers, contractors, and visitors to Operations Digital Solutions.

## Commitments

- We strive to minimize energy waste, optimize energy consumption, and improve energy efficiency while maintaining the quality of our products/services.
- We comply with all applicable legal and regulatory obligations related to energy management, energy efficiency, and environmental preservation, including ISO 50001:2018.
- We establish and achieve energy objectives, targets, and action plans aligned with our organization's overall strategic goals, including significant energy aspects, and stakeholder expectations.
- We identify and assess energy-related risks and opportunities, implementing appropriate measures to ensure energy objectives are met.
- We establish effective communication channels to ensure the dissemination of energy-related information to all relevant stakeholders.
- Our Energy Management System is part of the Signify Quality System to ensure our employees and stakeholders understand their commitment and contribution to the overall objectives.
- We actively involve suppliers and partners in ensuring that procured and delivered goods and services contribute to our energy objectives.
- We continually improve our energy performance based on on-site measurements, detailed analysis, and fact-based decisions.
