### Scope and methodology:

This disclosure covers unsold consumer products that were discarded during the reporting period in all EU markets by Signify N.V. or under its responsibility as an EU economic operator.

The information is presented in accordance with the mandatory reporting fields set out in the ESPR Regulation (EU) 2024/1781, including product categorisation, quantities and weight of discarded products, reasons for discarding and applied waste treatment operations.

Signify N.V. has implemented the following measures to prevent the destruction of unsold consumer products:

- **Slow-moving inventory reduction programme:** Regular reviews of inventory levels are conducted to identify slow-moving products and implement corrective actions, including demand planning adjustments to minimise the risk of products becoming unsellable.
- **Inventory rebalancing across markets:** Unsold products are reallocated to other geographical markets or sales channels where they remain viable and compliant with local requirements, thereby prioritising sale and use over discarding.

Signify N.V. plans to further strengthen its prevention of unsold consumer products through the following measure:

- **Portfolio health improvement programme:** Signify is implementing stricter portfolio management criteria whereby products are required to meet defined minimum turnover and margin thresholds. Products that do not meet these thresholds are subject to review, redesign, or phase-out decisions prior to production scale-up. This approach is intended to prevent the manufacture of products with a high risk of becoming unsold, thereby reducing the potential need for discarding.
