**Background:**

1. Signify' s vision is to streamline and unify all systems under the Interact platform. In alignment with this direction, the Individual Light Point and Group Management propositions have now been extended within Interact City. Going forward, all innovation and feature enhancements will be developed exclusively on Interact City, reducing the need to maintain redundant legacy systems.
2. Information on how customers will be upgraded from AmPLight to Interact City Group Management will be announced later.

**Briefing:**

All new customer requiring Group Light Management will be offered Interact City Group management after the End of Sale date.

**Exceptions to this End of Sale announcement:**

Existing AmPLight Group Management customers may continue installing new controllers at their project sites while retaining the current contract end date, until their site is upgraded to Interact City.
