

NatureConnect

by Signify

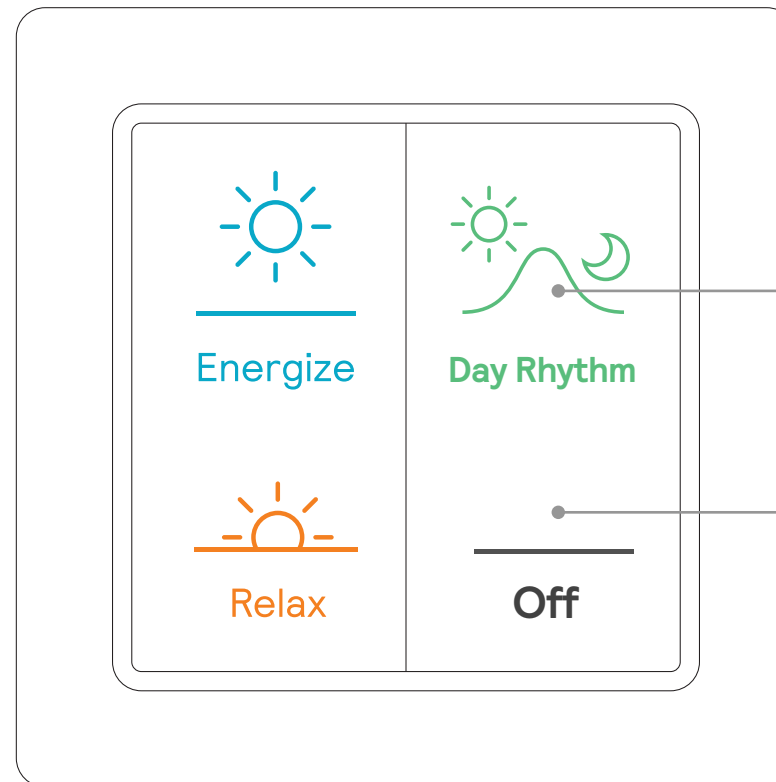

Brings natural daylight, making you feel better and boosting your energy

Energize

is an extra bright scene to give you an additional boost of energy when you need it.

Relax

is a soft and warm scene to create a relaxed and mellow atmosphere when you need it.

Day Rhythm

automatically regulates the lighting to be correct for the time of day and is the default scene

Press & Hold > Dim up

Press & Hold > Dim down

Off

to switch off manually. With presence sensors, the system will switch off automatically

The Day Rhythm of NatureConnect automatically adjusts the brightness and light color over the day, providing you with a strong sense of time. It provides the best light experience for each time of the day. The fresh tones in the morning can give people a good start to the day while warmer evening tones signal the end of the working day.
