Create a learning environment for bright ideas

Lighting for Higher Education
A comprehensive portfolio

As the global leader in lighting for more than 125 years, Signify has the know-how and the most comprehensive portfolio of energy efficient technology to meet all your application needs.

Educational establishments fulfill a unique role in society as places of learning, belonging, and community cohesion. LED lighting can enhance the learning environment, contribute to comfort and wellbeing, and help sustainability efforts while reducing energy and associated costs compared to traditional lighting. Signify LED lighting creates inviting outdoor areas and indoor spaces that inspire concentration and focus to support your educational objectives for today, tomorrow, and the future.

Visit www.signify.com/highereducation to learn more.
Convert to LED lighting to reduce energy usage and utility spend

Leverage Interact IoT technology to optimize energy usage and maximize savings.
LED lighting can reduce energy usage and utility spend by up to 80\%\(^1\), extending the life of your equipment.
Keep maintenance to a minimum with long-lasting LED technology and digital controls that allow you to apply light only as needed.

Contribute to cognitive performance with adaptable lighting

Help support circadian rhythm regulation with spectrally-tuned LED systems and Interact bio-adaptive lighting.\(^2\)
Inactivate viruses and bacteria in the air and treat surfaces using UV-C technology.
Leverage remote management to monitor the status of your connected lighting system at any time.

Take advantage of control systems to change lighting requirements for a variety of visual tasks supporting different modes of learning

Contribute to productivity, supporting daytime vitality\(^3\) and alertness\(^4\), with lighting systems that allow scene changes at the touch of a button.
By changing color or intensity of the lighting through controls, you can create an ambience to stimulate debate or deliver a calm mood.
Enhance attractiveness to prospective families and business partners by using light to reflect your brand identity or create a particular mood.

Use light only where and when it is needed

Optimize energy consumption and reduce carbon footprint using lighting controls.
Stay on trend while meeting sustainability goals with 3D printed, customizable luminaires.
Make your campus more sustainable through long-life, low-maintenance lighting and reduce your carbon footprint.

---

1. When compared to traditional incandescent bulbs.
Learning Areas:
Enhance focus and contribute to wellbeing with the right lighting.

Social Gathering:
Welcome students into large spaces for socialization or assemblies.

General Illumination:
A bright atmosphere to promote a sense of security and invigorate the community.

Outdoor:
Ensure parking lots, recreational areas, as well as walkways feel safe and well-illuminated.
Learning Areas

The health and wellbeing of students and staff is a key priority for educational establishments.

Lighting is an excellent way to modify the spaces in which students learn and the areas in which staff work. Lighting controls allow you to change lighting requirements for a variety of visual tasks, supporting different modes of learning in a single space. By changing the color or intensity of lighting, you can help to create an ambience which stimulates debate or delivers a calm mood. Consider upgrading to LED lighting to promote visual acuity, comfort and performance, while saving energy.
Learning Areas

Linear Wall Mount luminaires for classroom applications

Ledalite SyncLine Wall
Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Ledalite FloatPlane Wall Mount
Offers a fresh and playful look and performance that rivals that of high-end LED luminaires with the affordability of fluorescent.

Ledalite Jump Wall/Cantilever
Contemporary aesthetic that combines the latest lighting technologies with texture, pattern, and rhythm along an uninterrupted end-to-end continuum of luminance.

Ledalite TruGroove Wall Mount
Drives performance beyond the edge. Innovative optics deliver exceptional uniformity and wide row spacing from a 3” aperture continuous line of light.

Linear Suspended luminaires for classroom applications

Ledalite SyncLine Suspended
Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Ledalite FloatPlane Suspended
Offers a fresh and playful look and performance that rivals that of high-end LED luminaires with the affordability of fluorescent.

Ledalite Jump Suspended/Surface
Offers aesthetic design elements and playful patterns with multiple distributions in a seamless continuum of luminance.

Ledalite TruGroove Suspended
Drives performance beyond the edge. Innovative optics deliver exceptional uniformity and wide row spacing from a 3” aperture continuous line of light.

Recessed Troffers solutions for classroom applications

Day-Brite FluxGrid Recessed
Offers a familiar style with high quality LED light at an affordable price for your general lighting needs.

Day-Brite FluxGrid Gen 2 Recessed
Offers architectural appeal with “must have” features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite FormFlex Recessed
Delivers high performing, even illumination and visual comfort through a fully luminous aperture.
Learning Areas

Downlighting luminaires for classrooms applications

**Lightolier SlimSurface**
Sleek, damp location rated, 5/8” thick LED surface-mounted luminaire with the appearance of a recessed downlight.

**Lightolier LyteProfile**
Flexible and design-friendly, offering both square and round options, without compromising quality.

**Lightolier Calculite**
Offers quality uniform illumination, patented installation flexibility, and industry-leading visual comfort to support concentration.

Recessed Troffers solutions for library applications

**Day-Brite FormFlex Recessed**
Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

**Ledalite SilkSpace Definition**
Fully luminous lens, providing excellent visual comfort at a cost-conscious price, ideal for tight budget library projects.

**Ledalite ArcForm**
Highly efficacious, fully luminous fixture with brilliant color rendering and an innovative 3D symmetrical batwing lighting distribution. It delivers pure white light, free of glare, color shifts, hot spots or striations.

Low bay luminaires for library applications

**Day-Brite FluxStream Wraparound**
High-performing, energy-efficient luminaire delivering smooth diffused light.

**Day-Brite FluxSpace**
Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

**3D Printed BA L Series**
Offers customizable color, texture, finish, and mounting options to build your school’s brand while contributing to a sustainable future.

**Day-Brite 5F LED Specification Industrial**
Combines traditional aesthetics with high-performing features and specifications, delivering smooth diffused light.
Learning Areas

**Downlight luminaires** for library applications

- **Lightolier EasyLyte**
  Budget-friendly, adaptable and flexible for easy-installation needs.

- **Lightolier LyteProfile**
  Flexible and design-friendly, offering both square and round options, without compromising quality.

- **Lightolier Calculite IntelliHue technology**
  Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

**Linear strips** for library and lecture halls applications

- **Day-Brite FluxStream Strip**
  High performing, energy-efficient luminaire delivering smooth diffused light.

- **Day-Brite NWL LED Wraparound**
  Economical, surface mount, general illumination luminaire for commercial use. The slender form and frosted lens create an appealing visual aesthetic.

- **Ledalite TruGroove Recessed**
  Drives performance and delivers exceptional uniformity.

- **Ledalite TruGroove Recessed Micro**
  Offers a 1-3/4” aperture that delivers exceptional uniformity and wide row spacing. Custom colors and angles are available.

**Pendants** for library and lecture halls applications

- **3D Printed Decorative Pendants**
  Support a circular economy while offering customizable, stylish and flexible options.

- **Lightolier Calculite Cylinder**
  Features industry leading visual comfort and uniform illumination to accent display cases.
Learning Areas

Downlighting luminaires for lecture halls applications

- **Lightolier LyteCaster**: Offers ideal, quality and comfortable light while conserving plenum space.
- **Lightolier LyteProfile**: Flexible and design-friendly, offering both square and round options, without compromising quality.
- **Lightolier Calculite with IntelliHue technology**: Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

Track lighting for library, lecture halls and art gallery applications

- **Lightolier Track Head**: Simple and budget-friendly.
- **Lightolier BoldFlood**: Designed for energy savers looking to maintain high quality performance and rich color saturation from an aesthetic track luminaire.
- **3D Printed MS Series**: Allows you to choose from a variety of finishes and textures, configured to your specifications.
- **Lightolier OmniSpot**: Provides sleek and discrete aesthetics and high power.

Downlighting luminaires for chemical, computer or engineering laboratory applications

- **Lightolier SlimSurface**: A slim, surface-mounted option that is great for utility closets.
- **Lightolier LyteProfile**: Flexible and design-friendly, offering both square and round options, without compromising quality.
- **Lightolier Calculite**: Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

Learning Areas

Cleanroom luminaires  
for chemical and engineering laboratory applications

Day-Brite Kleenseal 100  
Recessed Cleanroom  
Practical luminaire, well-suited for chemical or engineering laboratories.

Day-Brite FluxPanel  
Versatile cleanroom luminaire designed to provide smooth lighting gradient on the lens surface and ease of installation. Available for use in recessed, suspended, and surface mount orientation.

Day-Brite FluxStream Sealed Strip  
Linear option, suitable for wet locations and available in a variety of lengths and color temperatures.

Linear industrial luminaires  
for chemical laboratory applications

Day-Brite V3W Vaporlume  
Specialized wet location, IP rated product designed for use in both indoor and outdoor environments. It is a wet location listed, noncorrosive luminaire, ideal for cold storage environments.

Linear industrial luminaires  
for engineering laboratory applications

Day-Brite FluxStream Sealed Strip  
Linear option, suitable for wet locations and available in a variety of lengths and color temperatures.

Day-Brite LBX Linear Suspended  
Provides versatility, delivering up to 150 LPW and offering multiple light distributions, along with the capability of simple row mounting. Optional LightBalance Optics put the light where it’s needed.

Day-Brite FluxSpace  
Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Day-Brite DW Vaporlume Industrial  
Sealed and durable for use in wet locations.

Linear strips  
for computer laboratory applications

Day-Brite FluxSpace  
Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Ledalite BoldPlay Suspended  
Provides broad, indirect distribution for uniform, glare-free lighting, ideal for screen time in computer labs.

Ledalite TruGroove Suspended Micro  
Offers a 1-3/4” aperture that delivers exceptional uniformity and wide row spacing. Custom colors and angles are available.

Ledalite TruGroove Recessed  
Drives performance and delivers exceptional uniformity.
Retrofit Solutions

Recessed troffers
for library, classrooms, and administration office applications

Philips EvoKit retrofit kit
Easily upgrade existing fluorescent troffers to fast-track payback with energy-efficient LEDs in just 5 minutes.

Downlighting
for library, administration offices, lecture halls, classrooms and laboratory applications

Lightolier Commercial Retrofit Downlight
An easy and quick downlight solution that is perfect for varying ceiling heights.

LED Spots for downlights, pendants, track, and low bays

Philips CorePro LED PAR and MR lamps
Offer efficiency and quality to meet your basic lighting needs.

Philips MasterClass LED ExpertColor PAR lamps
Provide warm, rich light to create an inviting atmosphere.

LED Bulbs for pendants

Philips CorePro LED A-Shape lamps
Deliver energy savings, minimized maintenance cost and dependable performance, compared to traditional incandescent bulbs, to meet your basic lighting needs.

Philips MasterClass LED A-Shape lamps
Feature smooth dimming down to 10% or less in a variety of color temperatures to create an inviting atmosphere any time of day.

TLEDs for troffers and linear fixtures

Philips CorePro LED InstantFit Linear lamps
Integrate into traditional fluorescent form factors to upgrade your general lighting and conserve energy.

Philips MasterClass LED InstantFit Linear lamps
Provide consistent light output for quality illumination and are available in plastic for shatter resistance.
Social Gathering

Welcome the campus community into large, indoor spaces to share in special moments with peace of mind. Consider UV-C solutions in lecture halls to add a layer of protection in busy spaces. LED lighting can be used to change the mood for different events, add color to a space or to simply save energy.
Social Gathering

**Downlighting** for dining hall, arena, student center and auditorium applications

- **Lightolier EasyLyte**
  Budget-friendly, adaptable and flexible for easy-installation needs.

- **Lightolier LyteProfile**
  Flexible and design-friendly, offering both square and round options, without compromising quality.

- **Lightolier Calculite**
  Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

- **Lightolier Calculite with IntelliHue technology**
  Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

**Pendants** for dining hall, arena, student center and auditorium applications

- **3D Printed Decorative Pendants**
  Support a circular economy while offering customizable, stylish and flexible options.

- **Lightolier Calculite Cylinder**
  Features industry leading visual comfort and uniform illumination to accent display cases.

**Low bay** for dining hall, arena, student center, auditorium and gymnasium applications

- **Day-Brite FluxStream Strip**
  High performing, energy-efficient luminaire delivering smooth diffused light ideal for hallways.

- **Day-Brite FluxSpace**
  Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

- **3D Printed BA–L Series**
  Offers customizable color, texture, finish, and mounting options to build your school’s brand while contributing to a sustainable future.

- **Day-Brite FluxGrid Gen 2 Recessed**
  Offers architectural appeal with “must have” features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.
Social Gathering

Architectural solutions

Ledalite
Explore the entire offering of award-winning, inspiring, and innovative indoor lighting solutions that allow specifiers to create a unique vision.

Color Kinetics
Delivers indoor and outdoor LED lighting systems in a wide range of types, form factors, and output levels — empowering you to achieve your unique vision.

Recessed troffers for dining hall applications

Day-Brite FluxGrid Recessed
Offers a familiar style with high quality LED light at an affordable price for your general lighting needs.

Day-Brite FluxGrid Gen 2 Recessed
Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite FormFlex Recessed
Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Canopy for dining hall applications

Gardco SoftView
Features edge-lit technology for visual comfort with minimal glare, making it great for a dining area. Provide a sense of security after dark with an added uplight feature.

Linear Suspended for dining hall applications

Ledalite SyncLine Suspended
Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Ledalite FloatPlane Suspended
Provides the affordability of fluorescent with the quality of high-end LED luminaires

Ledalite Jump Suspended
Offers aesthetic design elements and playful patterns with multiple distributions in a seamless continuum of luminance.

Ledalite TruGroove Suspended
Drives performance and delivers exceptional uniformity.

Step Light solutions for auditorium applications

Chloride SoftGlo Night Light
Provides low-level illumination for small areas in a variety of color temperatures and finishes.

Chloride PathMaster Mini Step Light
An architectural, customizable, and energy-efficient option.

Chloride SD Series Step Light
A small, weather-proof option available in a variety of color temperatures and finishes with different faceplate options.

Chloride MSL Series Mini Step Light
A mini low-level lighting option offered in a variety of finishes, ideal for an auditorium.

Tape Light
for auditorium applications

Vaya Free Form
Sets the mood of interior and exterior spaces with this compact, bendable LED luminaire.

High Bay (Round) for gymnasium, arena, and auditorium applications

Day-Brite HCY LED High Bay
Presents functional lighting with an aesthetic appeal and round form factor perfect for a gymnasium, auditorium, or other area of a school with high ceilings.

3D Printed PM Series
A small, weather-proof option available in a variety of color temperatures and finishes with different faceplate options.

Day-Brite RBX LED High Bay
Fulfills your general lighting needs with a variety of lumen packages and color temperatures.

High Bay (Rectangular) for gymnasium and arena applications

Day-Brite FCY LED High Bay
Merges performance with quality for a cost-efficient, high-ceiling solution.

Day-Brite FBY LED High Bay
Versatile in form and function with a variety of lumen packages and accessories for your needs.

Day-Brite FBZ LED High Bay
Combines targeted optics with energy efficiency to provide the right light in your space.

Day-Brite HBY High Bay
Provides durability in an appealing compact form and is suitable for use in wet locations such as your natatorium.

  Help reduce energy usage in your existing HID high bay application.

- **Philips MasterClass LED TrueForce High Bay lamps**
  Couple light distribution and high color rendering with energy efficiency to create a comfortable and high productivity environment.
General Illumination

LED lighting can be used to invigorate students and staff throughout campus.

Provide welcoming environments with adjustable, energy-efficient LED lighting to promote wellbeing while limiting energy consumption. Choose from a variety of LED lamps and luminaires to enhance the atmosphere within your buildings, using light to reflect your brand identity or create a particular mood.

Now more than ever, the health and security of everyone on campus is a top priority. Consider UV-C solutions to treat the air and surfaces of busy spaces and inactivate bacteria and viruses. Provide a sense of security in dark areas, such as stairwells or outdoor walkways, and use control solutions to conserve energy and prioritize sustainability, using light only where and when it is needed.
General Illumination

Recessed Troffers for hallway, stairwell, restroom, and administration office applications

Day-Brite FluxGrid Gen 2 Recessed
Offers architectural appeal with “must have” features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite EvoGrid Recessed

Offer efficiency and quality to meet your basic lighting needs.

Philips MasterClass LED ExpertColor PAR lamps
Provide warm, rich light to create an inviting atmosphere.

LED Bulbs

Philips CorePro LED A-Shape lamps
Deliver energy savings, minimized maintenance cost and dependable performance, compared to traditional incandescent bulbs, to meet your basic lighting needs.

Philips MasterClass LED A-Shape lamps
Feature smooth dimming down to 10% or less in a variety of color temperatures to create an inviting atmosphere any time of day.

TLEDs

Philips CorePro LED InstantFit Linear lamps
Integrate into traditional fluorescent form factors to upgrade your general lighting and conserve energy.

Philips MasterClass LED InstantFit Linear lamps
Provide consistent light output for quality illumination and are available in plastic for shatter resistance.

Visit www.signify.com/highereducation to learn more.
Security & Emergency

Promote a sense of security and comfort by ensuring well-lit spaces throughout the interior and exterior of the building.

Now more than ever, the health and safety of students and staff is top priority. Consider upper air UV-C solutions to inactivate viruses and bacteria in busy areas, such as gymnasiums and dining halls. Meet code requirements with exit and emergency solutions that provide a sense of security for your students and staff in hectic moments.
Security & Emergency

Exit/Emergency luminaires

Chloride Value+ VLTC Exit Combo
Suitable for any general-purpose application with its low-profile design and affordability.

Chloride Compac CLC Exit Combo
Prepares you for any emergency with its sleek design that enables general wayfinding and immediate egress in an emergency.

Chloride Edge-Lit 44R Exit Sign
Features a contemporary universal and compact design that can be surface-mounted or recessed.

UV-C solutions for upper air and surface treatment applications

UV-C lighting can play an important role in neutralizing harmful viruses and bacteria, especially in mask-off environments such as cafeterias. This additional layer of protection may provide a greater sense of comfort for teachers and coaches, as they lead students while in classrooms and gymnasiums. UV-C upper-air and closed chambers can also run continually, helping to reduce the need for manual disinfection, especially in high-traffic areas such as restrooms or locker rooms.

Alkco UV-C Upper Air U2C 2x2 Grid Ceiling Mount
Treats air in occupied spaces to offer a layer of protection against bacteria, viruses, and fungal spores to help your students and staff feel secure.*

Alkco UV-C Upper Air UWL Louvered Wall Mount
Treats air in occupied spaces to offer a layer of protection against bacteria, viruses, and fungal spores to help your students and staff feel secure.*

Alkco UV-C Surface UST Strip
Can immobilize bacteria on preparation surfaces and equipment with surface and suspended mounting options.

Alkco UV-C Surface UHB High Bay
Can immobilize bacteria on preparation surfaces and equipment for ceiling heights of 10' to 25'.

Philips Dynalite UV-C Controls
Control system allows the UV-C lighting system to be used and operated with greater safety than a system without an equivalent control solution in place.

Interact
The Interact Space Management application can be used to further identify which areas have been occupied and need to be sanitized, as well as help manage social distancing.

Once BioShift Chambers
Uses UV-C light to inactivate viruses and other pathogens on objects placed in the chamber, neutralizing most viruses in 5 minutes.

*Signify wall mount and ceiling mount upper air UV-C luminaires were tested for SARS-CoV-2 in Innovative Bioanalysis Lab. The wall-mounted luminaire achieved 99.9% reduction in 10 minutes and the ceiling mount luminaire achieved 92.6% reduction in 20 minutes. The luminaires were also tested for Escherichia coli in Intertek Lab. Both luminaires achieved 99.9% reduction in 45 minutes.
Outdoor

Provide a sense of security throughout your campus with long-lasting LED lighting. Enhance peace of mind with quality illumination in parking lots, walkways and recreational areas as students, staff and visitors explore campus, travel to their next class or grab a quick meal.
Outdoor

Wall Mounted lighting solutions for perimeter applications

Stonco WallPack DualSelect
Combines classic design with LED for energy-efficient wall lighting.

Stonco LytePro Wall Sconce
Features outstanding value in a small and compact, architectural design, combining energy efficiency with performance.

Gardco 121 LED Sconce
Offers a stylish, powerful optical design, while delivering high light levels and functional distributions for excellent visibility.

Gardco PureForm PWS Comfort Wall Sconce
Provides clear line of sight to your building with its sleek, low profile design and comfort optics.

Floodlighting for perimeter and track and field applications

Stonco Slim Flood
Your best value for general floodlighting with a discreet and modern design.

Gardco DuraForm
Provides seamless replacement of HID luminaires in three sizes.

Gardco ClearScape
Features an architecturally stylish design that will complement your field’s visual landscape.

Pedestrian/Site and Area for pathway, parking lot, parking structure, and street applications

Stonco Area Light
Pole-mounted fixture delivering value with high energy efficiency.

Gardco EcoForm
Combines economy with performance and makes it simple to switch to LED and brighten your parking area.

Gardco PureForm Area
Features a sleek and low-profile fixture, available in a variety of sizes with arm mount, post top, or bollard designs. Comfort optics enhance visual comfort by reducing glare to provide a sense of security in your parking lot.
Outdoor

Post Top for pathway applications

**Gardco PureForm Post Top comfort**
Features a sleek, low profile design with comfort optics to reduce glare.

**Lumec MetroScape Post-Top**
Features flexible, robust energy-efficient solutions for heritage-styled urban architectural lighting.

**Hadco Hagerstown Post Top Comfort**
Offers modular post top concepts to create a unique style, combining a traditional look with modern LED technology.

**Hadco Refractive Post Top with LumiLock LED**
Beautifies outdoor spaces while adding a sense of security. Its configurable LED light engine is the ideal alternative to HID sources.

**Lumec UrbanScape Post-Top Comfort**
Features flexible, robust energy-efficient solutions for modern urban architectural lighting.

Bollards for pathway applications

**Gardco PureForm PBL**
Integrates a sleek, low profile design, extraordinary light output, and energy savings into an innovative pedestrian scale luminaire.

**Gardco Louver Bollard**
Provides uniform illumination, superior spacing and solid vandal resistance.

**Gardco Full Cutoff Bollard**
Features LEDs concealed below cast louvers to provide down lighting for landscape and pathway applications.

**Lumec SleekVision Bollard**
Features ClearGuide, a revolutionary, vertically-oriented light engine designed to reduce pixelation and glare in a sleek form factor.

**Lumec ClassicStyle Bollard**
Features ClearGuide, a revolutionary, vertically-oriented light engine designed to reduce pixelation and glare in a classic style.
Outdoor

**Canopy** for parking structure applications

- **Stonco Garage and Canopy Round DualSelect**
  The go-to durable, cost-effective lighting solution for your parking garages, covered walkways and outdoor canopies in a round form factor.

- **Day-Brite FluxStream Sealed Strip**
  Linear option, suitable for wet locations and available in a variety of lengths and color temperatures.

- **Gardco SoftView**
  Features edge-lit technology, providing visual comfort with minimal glare to enhance visibility in your parking garage. An added uplight feature reduces cave effect for an increased sense of security.

**Roadway/Parking lot** for parking lot and street applications

- **Lumec Roadway Security Luminaire**
  The definition of security made simple and affordable with easy installation, maximized operations and maintenance savings.

- **Lumec RoadFocus Cobra Head**
  Features a sleek design and provides seamless replacement of HID luminaires in three sizes.

- **Lumec RoadStar Architectural Roadway**
  Combines a decorative look with powerful performance in two sizes.

**Architectural**

- **Color Kinetics**
  Delivers indoor and outdoor LED lighting systems in a wide range of types, form factors, and output levels — empowering you to achieve your unique vision.

**Retrofit Solutions**

**Corn Cob lamps**

- **Philips CorePro LED Corn Cob Lamps**
  Maximize energy savings with this LED solution at an affordable price.

- **Philips MasterClass LED TrueForce Corn Cob Lamps**
  Provide the “perfect fit” with uncompromising efficacy and color quality to keep parking areas brightly lit.

**Wall Pack lamps**

- **Philips CorePro LED Wall Pack Lamps**
  An ideal HID replacement providing high intensity illumination for added visibility outside of your building.
The benefits of lighting controls

Because it helps you become the school you want to be.

Lighting controls save energy, are often required by code, and allow adjustable lighting to enhance a learning environment. Take advantage of Signify’s expansive controls portfolio to reap the benefits.

Enhance your security

Use sensors to detect movement, instantly activating lights after hours. Interact Pro complies with DLC cybersecurity requirements to ensure the safety of your system.

Smart lighting can boost efficiency in three ways.

1. Energy efficiency
   By switching to LED you’ll achieve the same light output using far less energy.

2. Longer lifespan
   Save on replacements with long-lasting LED technology reducing cost, hassle and disruption.

3. Automation
   Add lighting controls to save year on year by aligning your lighting usage with your work day.

- Use sensors to detect light levels and adjust lighting outputs to provide only the light that’s needed.
- Turn lights on/off or dim light levels using motions sensors – no more forgotten rooms.
- Use data from your Interact Pro dashboard to help you optimize energy usage.

A. Occupancy-based dimming
B. Daylight sensing and dimming
C. Occupant personalization
D. Task-based tuning (dimmers/switches)
E. Combined strategies

Use sensors to detect movement, instantly activating lights after hours. Interact Pro complies with DLC cybersecurity requirements to ensure the safety of your system.

Use adjustable lighting to improve classroom comfort and help stimulate and engage pupils.

Visit www.signify.com/highereducation to learn more.
Many Signify and Philips LED products*, including Interact Pro, are DesignLights Consortium qualified in standard and premium categories. According to research, DLC has documented that controls can save up 32% energy savings in an education facility.

### Code Compliance

Different code requirements mandate certain control strategies. Whether you’re doing a school retrofit project or building a new facility, make sure you are meeting code.

1. A control factor is a number between 0 and 1, representing the fraction of the energy saved through controls. 0 represents no savings, and 1 means all energy is saved. Control factor is equivalent to percent savings (% savings) when presented in percentage. For example, a control factor of 0.49 is equivalent to 49 percent savings (49% savings).

2. The range for the middle 50% is displayed instead of the full range between the minimum and the maximum to provide a more representative range of savings one can generalize and expect.

3. In this report, the control factors for control strategies other than high-end trim, unless otherwise noted, are in comparison to an inferred baseline with savings from high-end trim removed. Therefore, the control factors for high-end trim and other control strategies will not add up to the overall control factor. See Page 33 for a more detailed discussion.

Did you know that many utility companies offer rebates as an incentive to commercial customers for upgrading to more energy efficient lighting?

Find utility rebates on Signify products at www.usa.lighting.philips.com/support/support/legislation/utility-rebates

* Please see the DLC QPL list for exact catalog numbers. www.designlights.org/QPL
Both standalone and networked control solutions that meet code requirements, maximize energy savings potential and support flexible functional behaviors, which are ideal for classrooms. With backend software, the system offers the ability to visualize and monitor energy consumption as well as manage lighting assets throughout your school.

Consider a factory pre-configured Room Automation System (PDRAS) with out-of-box scenes and sensor behaviors that are designed to support your learning environments. Save on labor costs with plug and play CAT5 installation between all the control devices and balance your budget with the flexibility to install the PDRAS in a single room application with up to five zones or in a dual room application with up to two zones per room. Moreover, the system is scalable and allows all the spaces to be networked together for central monitoring and management capabilities.

The Philips Dynalite PDRAS brings energy management, occupancy detection, daylight harvesting, and code-compliance for multizone spaces, with simple, intuitive controls and optional ethernet connectivity for plug-and-play installation. The PDRAS uses the latest generation of Dynalite hardware, preprogrammed and configured in our factory to work seamlessly together. Simple plenum installation with pluggable user interfaces and sensors ensures industry-leading performance right out of the box.
Signify Interact Pro helps to boost energy savings, reach sustainability targets, and enhance occupancy comfort levels immediately from day one.

Interact IoT platform is a secure, scalable, and sustainable cloud-based Internet of Things (IoT) platform designed to help run your operations sustainably, efficiently and reliably. The Interact Pro scalable system is a cost-efficient and wireless solution for every step of your smart lighting journey. The system is fully scalable, so it can grow as building requirements grow – from smart to super-smart. This system is fully compliant with all standard regulations to claim utility rebates (ASHRAE, Title 24, IECC, UL924, DLC).
