Instruct Software

## Introducing a new design tool for your Interact projects

Benefits

- ✔ Simplify your specification workflow
- ✔ Quickly create a bill of material
- ✔ Validate luminaire and controls configurations
- ✔ Visualize sensor coverage patterns
- ✔ Integrate seamlessly into your quoting process
- ✔ Generate a comprehensive BOM
  (link supplementary documents and build a submittal package)

Instruct Software

Features

1. Single sign-on into the tool
2. Create and view your own projects
3. Upload floor plan
4. Scale floor plan
5. Search for luminaires and control devices
6. Drag, drop and label luminaires and devices in floor plan
7. Visualize wireless and occupancy coverage
8. Validate wireless design
9. Add notes and show/hide notes
10. Generate and export bill of materials to the Signify Portal
11. Generate a package of documents
12. Upload external documents to project
13. Group select products and move, assign network numbers, delete and align
14. Calculate the quantity of startup service days required
15. Compatible with Foundation and Advanced tiers of the Interact offering
