

## Instruct Software

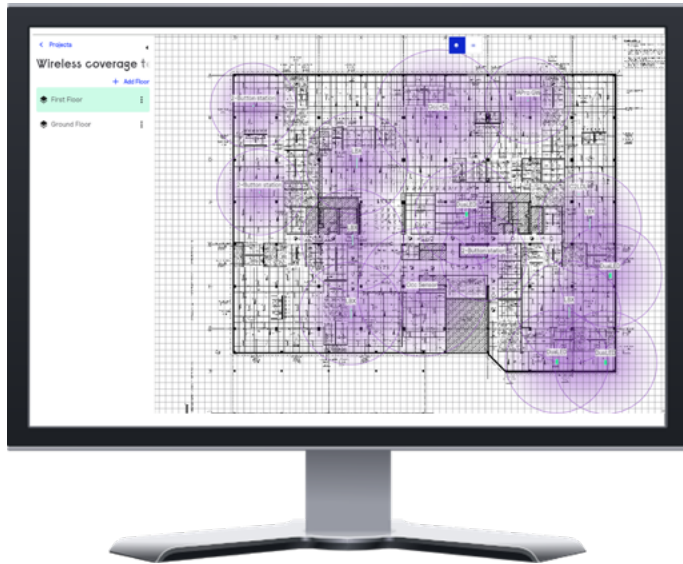

Introducing a lighting and control design specification tool for Interact

- ✓ Simplify your specification workflow
- ✓ Validate luminaire and controls configurations
- ✓ Visualize sensor coverage patterns and generate device placement with legend
- ✓ Make product decisions quickly with accurate pricing and stock availability
- ✓ Supports standalone and gateway configurations
- ✓ Easily import electrical drawing sets
- ✓ Integrate seamlessly into your quoting process
- ✓ Specify services with automated calculations for factory startup
- ✓ Generate a comprehensive BOM
- ✓ Build a submittal package and link supplementary documents

# Instruct Software
