

Removability Introduction

Disposal at End of Life

Light source reference control setting

Composition Explanation – PSL Gradient Floor

A. Composition Explanation

Control gear

Base cover

Switch PCBA

Light source:

- Pole glued with base

Removability Introduction on Disposal at End of Life

Composition Explanation – PSL Gradient Floor

B. Steps to remove the components

Type: without permanent damage
Recommendation on disposal
Plastic part: reuse and recycling
Electrical part: disposal
Metal part: recycling

Removability Introduction on Disposal at End of Life

Composition Explanation – PSL Gradient Floor

C. Setup the test

Gradient floor using 12Vdc adaptor

D. Reference control setting

Gradient floor is decorative purpose product, it is not intended to produce white color light, it is possibly to generate the white color light in someway, to get the RCS of light source, the possible way to find the RCS CCT point (non-preset point) by:

- Plug in adaptor with 12Vdc/1A output, and power on
- To open WiZ APP → Connect the pole to WiZ App → Custom → find the proper test color point → start the test

For the test point, you are suggested to find the CCT point in the white circle area
