

Philips LED lighting for freezers. A sustainable and energy-efficient way to create an enjoyable shopping experience for customers.

PrimeSet

Thanks to their new design, the PrimeSet RDL500 / 510 modules can be aesthetically integrated in the door frames of vertical door freezers. The modules' unique integrated optical system directs the light in such a way that the products on display are presented uniformly, while reducing glare and dark spots.

Benefits

- The modules can be integrated in the door frames of vertical door freezers.
- True system proposition (modules + accessories + 24 CV drivers)
