

GameVision : the 1:1 retrofit of conventional floodlights for recreational sports.

GameVision

GameVision is a simple, easy to choose led floodlight to replace conventional installations in municipal football stadiums, hockey fields... Its specific hooded shape design ensures a limited perception of light outside the field of play, hence a better comfort for people living nearby, but also favors dark skies. The light distribution is maintained all along the product lifetime as the reflector inside is protected against pollution and corrosion.

Benefits

- 1:1 retrofit of conventional floodlights in recreational sports
- Easy to choose
- Low glare perception
- Favors dark skies

Features

- 1 "do-it-all" light distribution
- 2 levels of light output
- Weight and SCx similar to OptiVision HID (MVP507)
- Low to 0 tilt angle in application

Application

- Arena and Sports
