

# Create comfort and efficient for your badminton courts

## Bright Star BVS211/BVS221

Philips Bright Star is a linear lighting solution designed specifically for indoor recreational sports venues, providing bright, anti-glare, and energy-efficient white light to enhance visibility and visual comfort for facilities such as badminton courts. Featuring a sleek, streamlined design, Bright Star provides clean, continuous illumination ideal for court lighting. Its one-piece stamped steel backplate guarantees structural strength, while the front optical design effectively controls glare in the direction of movement—perfectly balancing aesthetics and performance. With versatile installation options—including wall mount, suspension, and V-type dual-hanging adjustable-angle accessories—Bright Star offers flexible deployment to meet diverse lighting needs. This high-performance linear luminaire combines modern design, reliability, and superior lighting quality for an engaging indoor recreational sports experience.
