

Easy, effective, smart lighting for all.

Interact Ready Controllers with Built-in Sensors

Expand your lighting game with Interact Ready wireless controllers with integrated occupancy and daylight sensors. Effortlessly extend Interact wireless control to any 0-10V or electronic low voltage luminaire. Ideal for downlights and linear systems, where multiple luminaires can be controlled together. Take advantage of advanced features like switching, dimming, energy metering, and wireless connectivity to other Interact ready devices to simplify your lighting management. Control all the lights in your building from a single system and take charge with Interact Ready.

Application

- Office
- Industrial
- Education
- Healthcare
- Retail
- Hospitality
