

# **Product Description**

### **UV-B Narrowband TL**

Tubular or compact single-ended low-pressure mercury vapour fluorescent lamps

#### **Benefits**

- · Minimum side effects like redness, itching and burns
- Shorter period of exposure and less erythemal radiation than conventional UVB lamps
- · Optimal therapeutic effect with minimum side effects
- · Proven to be most effective on the skin

#### **Features**

• Emit radiation for therapeutic and other applications

#### **Application**

- · Phototherapy in dermatology (psoriasis, SUP)
- $\cdot$  These lamps produce UV-B radiation which is harmful to human skin and eyes.

They are therefore only available for medical and industrial applications

#### **Warnings and Safety**

• A lamp breaking is extremely unlikely to have any impact on your health. If a lamp breaks, ventilate the room for 30 minutes and remove the parts, preferably with gloves. Put them in a sealed plastic bag and take it to your local waste facilities for recycling. Do not use a vacuum cleaner.
