Highlights

SceneSwitch color change

SceneSwitch Color Change lets you set the overall mood of a living space at home. Stay focused with cool daylight, be more productive with cool white light or wind down and relax with warm white light. In essence, consumers can control the lights in their home according to their daily activities.

Eyecomfort

Poor quality light can cause eye strain. With many of us spending time indoors, it's more important than ever to properly light your home. Our products meet stringent test criteria including flicker, strobe, glare, color rendition and dimming effects to ensure they
meet EyeComfort requirements. Philips LED bulbs not only deliver

comfortable light, but also stay that way for the duration of their lifespan, delivering consistent light quality, output, and color for more than a decade. Switch to light that's easy on your eyes. Your eyes will thank you.

Step dimming

Select from different dimming levels to create the right mood for the moment.
