High quality light
• No visible flicker

Choose a simple replacement for your old bulbs
• Similar shape and size as standard incandescent bulb

Choose for a sustainable solution
• Contains no mercury

Highlights

No visible flicker

When your light flickers in quick succession it could be hard on the eyes, cause headaches, and even set off an attack for those with photosensitive epilepsy. It's both unpleasant and unnecessary. LEDs can flicker because of their rapid response to the driver current. However, because Philips LEDs are designed so that variations in your driver current's output are minimized, they eliminate the factors that cause flicker. So, you won't see it, not even a hint.

Replaces standard incandescent

With its beautifully shaped design and familiar dimensions, this is a contemporary lighting, energy-saving standard LED bulb. The perfect sustainable replacement for traditional standard incandescent bulbs.

Contains no mercury

No mercury allows for non-hazardous waste disposal, so this characteristic provides a simple way to make your current space more sustainable.
