WiZ

Motion Sensor

The WiZ wireless indoor sensor sets your lights to turn on and off according to motion detection. Put it at the entrance or corridor and trigger on your desired light modes just by walking by, set it to turn off or to minimum brightness after you leave the room. It controls all the lights in a room and has a motion detection range of up to 3 meters. Set the sensor to trigger different light modes during different times of the day in the WiZ app (e.g. warm white in the evening or nightlight after bedtime).

PRODUCT HIGHLIGHTS

- Battery operated
- IP20/Plastic/White
- Works with all WiZ Connected products

Easy wireless installation
Battery-powered, no wire necessary. Make it a quick and easy install with screws on the ceiling / wall, or simply leave it on a desk.

Flexible motion settings for your convenience
Set your lights to turn on a preferred brightness or specific mode, such as nightlight or daylight. You can configure an action for your lights, with a specified delay, and when no motion is detected.

Set the right light for the right time
Set sensors to activate your favorites light modes at different times during the day, by setting specific Rhythms for a room in the WiZ app.

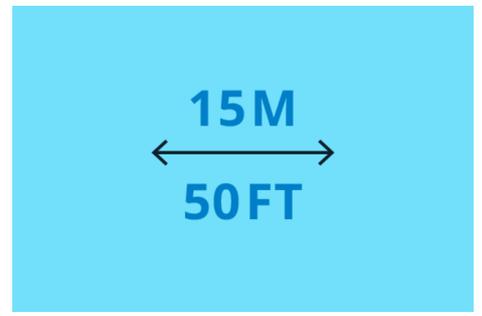

Compatible with all "Connected by WiZ" lights
This WiZ control accessory is designed to control all kinds of lights in the WiZ ecosystem. You can use it to control any lights from any brand as long as it's "Connected by WiZ."

Trigger lights with motion
Set your lights to turn on/off or change brightness and color whenever they detect any motion. This sensor connects directly to your WiZ lights and works even when the Wi-Fi is down.

Wide connection range of 15m / 50ft
This motion sensor connects with WiZ lights placed within a range of up to 15 meters or 50 feet in a normal indoor environment with partitions and walls.
