## Meet Maxos fusion

Adaptable LED trunking system where quality, performance and flexibility meet

### High quality of light, excellent uniformity and colour consistency

Maxos fusion's offers multiple flux/beam and color choices, plus a portfolio of specially-designed OptiSuit lenses for unmatched performance with visibly superior quality of light.

### High efficiency and long life

With very high efficacy options (up to 185lm/W) and very long lumen maintenance (100,000 hours @L80), designers can create optimized, bespoke solutions with an attractive total cost of ownership.

### Ready to connect

Dedicated sensor units enable you to take advantage of full advantage of InterAct system propositions so customers can make data-driven decisions in retail and industrial applications.

### Covers extensive applications

The ideal choice for a wide range of applications and lighting requirements from retail supermarkets and hypermarkets, to industry production floors and distribution centers and warehouses.

### Freedom to position and (re) position

Maxos fusion rail is the flexible, future-proof trunk that underpins the system. Positioning freedom makes it easy to upgrade/add/change components on the rail to extend the life of the backbone.

### A solution for all

Maxos fusion rail accommodates up to 13 wires in the trunk, so it can handle a wide variety of electrical circuit options, including emergency lighting to fit specific project demands.

# The right light for retail stores

In addition to helping you save on energy costs and improve sustainability, Maxos fusion gives you the power to design a store concept with a customizable ambience. Use the Maxos fusion trunking system as the flexible backbone enabling you to update according to new store layouts or trends in a very efficient way. Thanks to the combination of the trunk with the family of fixtures - including spots and non-linear - you can efficiently and in a non-disruptive way update your store lighting to match new concepts.

## Flexible layouts

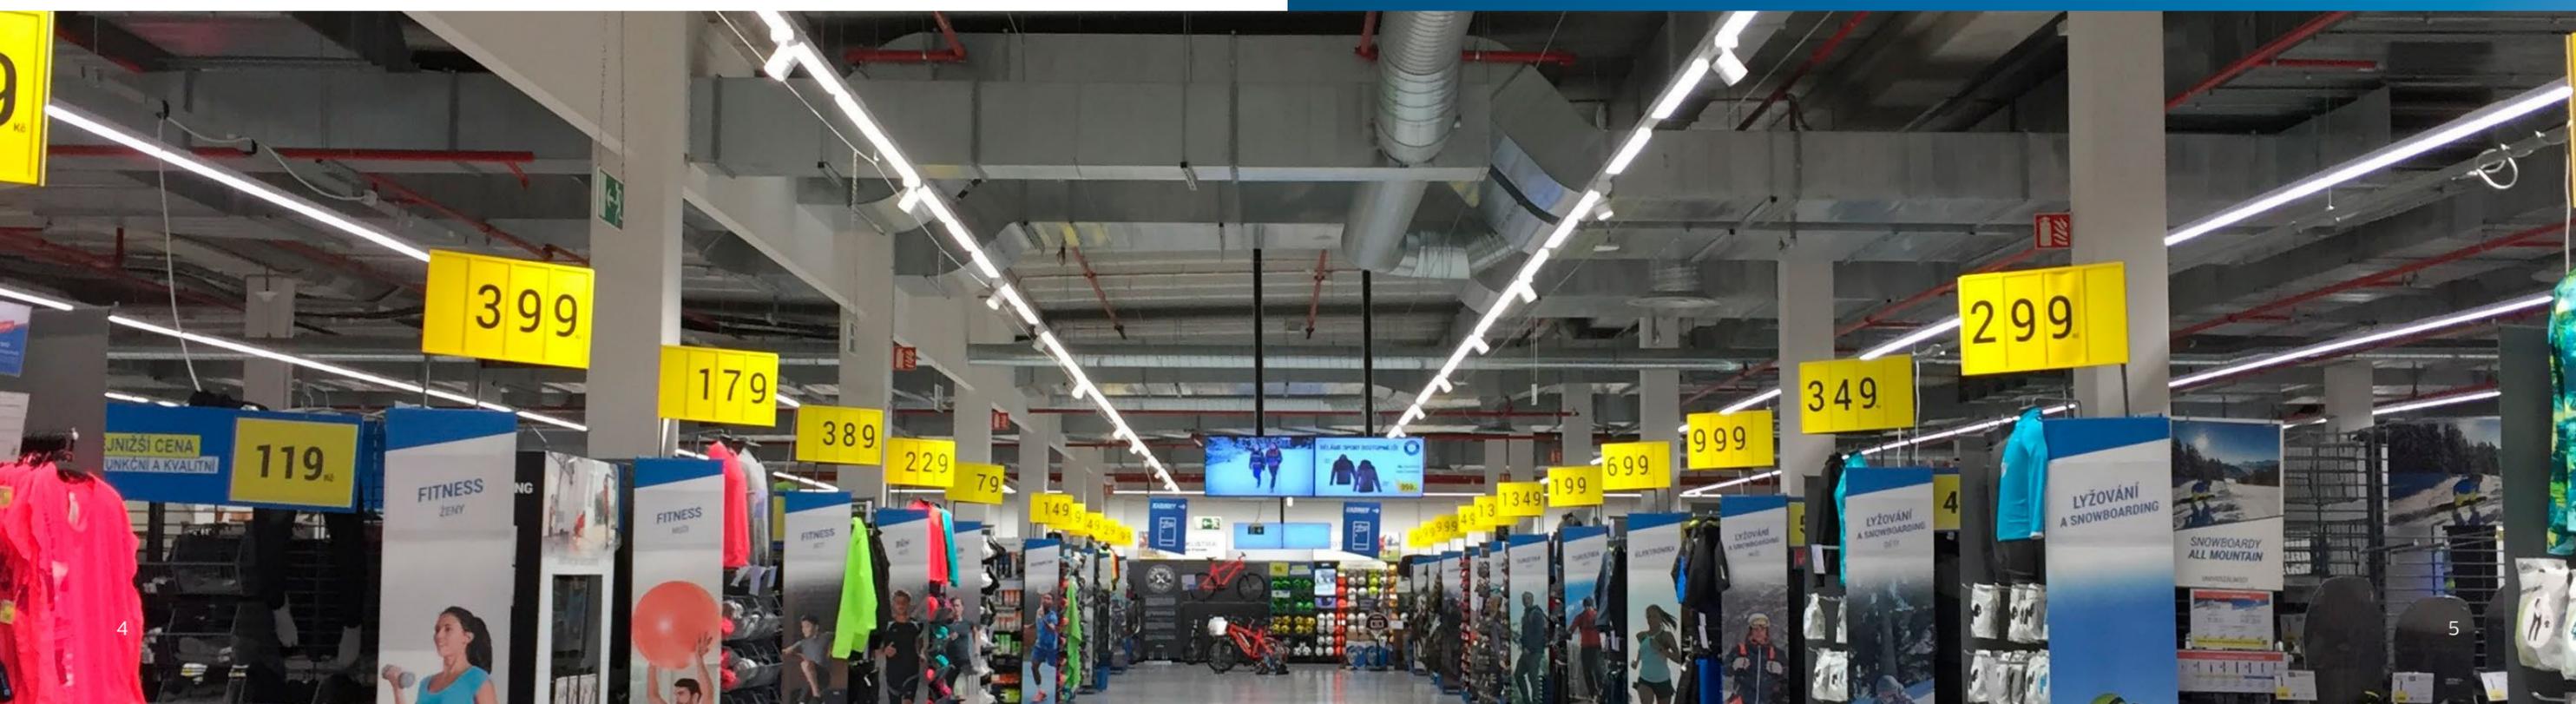

The adaptable new lighting system is fast to install, reposition and maintain. You have the freedom to click the lighting unit along the line so it can be easily positioned and re-configured.

## Merchandise sparkles

Our new range of optics has been specially designed to create beautiful ambiances in retail environments. The pleasant, diffuse light makes all the merchandise on display sparkle with quality. With a CRI of 80+ it brings out the best in every color and texture to enhance your store experience and ensure shoppers stay for longer. Maxos fusion provides comfortable light that is easy on the eye.

## Future proof

Maxos fusion is also a carrier of connectivity. As the Internet of Things becomes an integral part of the retail experience, it is ready to collect data and can use the infrastructure to send data - even to your shoppers. The trunking is ready to be connected to lighting systems such as Interact Retail Scene management to create dynamic lighting and increase savings further. Interact Retail Indoor navigation brings the power of GPS right into your store.

# The right light for industrial applications

Creating a safe environment is the first priority for industrial spaces. Now you can comply with industry regulations at the same time as maximizing the value of your investment with Maxos fusion.

### Excellent TCO

If you're looking for a general lighting solution with excellent performance, Maxos fusion offers a high level of great energy savings and minimum maintenance costs over a long and reliable lifetime.

### Comply with regulations

Maxos fusion meets all the relevant norms for industry applications. It delivers high illuminance levels at the required color temperatures with a CRI of 80+ and glare factors. Option to be connecting emergency lighting option, IP54 classification and the silicone free features provide you with a totally compliant lighting installation.

### Quality of light

Unlike conventional fluorescent installations, Maxos fusion provides outstanding quality of light. The light distribution is highly uniform without artefacts. And thanks to the wide variety of optics you can direct the light to precisely where it is required.

### Freedom of positioning

The adaptable new lighting system is fast to install, easy to reposition and maintain. You have full freedom to click the lighting unit along the line so it can be easily positioned and re-configured resulting in reduced downtime and the costs associated with layout changes. With up to 13 wires, it can also handle all electrical emergency lighting schemes.

### Future ready

To get more out of your lighting, you can connect Maxos fusion to GreenWarehouse, enabling you to define your own lighting zones, set dimming levels and plan lighting patterns using motion sensors and lighting controls.

Maxos fusion is also a carrier of connectivity. The trunking is ready to be connected to lighting system and software applications such as Interact Industry to optimize efficiency, maximize energy savings and improve productivity and safety.

## Food production

Maxos fusion complies with international food safety standards which means:

- Particles can't fall out of the Maxos fusion trunking and dust and moisture will not accumulate in the lighting unit, thus maintaining hygienic conditions.
- No loose components and no glass in the lighting installation for optimized food safety.
- Reduced power load compared to traditional systems (up to a factor of 2.5) ensures food production processes are not influenced by the lighting installation.
- Easy to clean lighting equipment.

## Automotive

- Flexibility is key in the automotive industry. If the assembly line needs to be rearranged, the Maxos fusion lighting can be adapted in a minute.
- Maxos fusion prevents glare, resulting in motivated employees with higher productivity and no complaints.
- Impact resistance and dust/water tightness are required along the assembly lines. The optional IP54 solution combines them both, resulting in a sturdy and reliable lighting solution.
- Maxos fusion is silicone free, meeting specific demands in the automotive industry and preventing issues in the surface coating processes.

## Warehouse and logistics

- Maxos fusion offers a high degree of flexibility to mount and reposition luminaires anywhere along the line. This accommodates tenant changes or change in usage very easily.
- Appropriate optics for areas with very high ceilings and narrow aisles provides the right lighting for employees and creates excellent visibility, and a safe environment in any type of warehouse.

# OptiSuit™, a superior lighting choice

It is clear that specifying the right lighting for retail and industrial requires finding the right balance between efficiency, performance, energy savings and safety. But in order to make a fully-informed lighting decision, you must also consider the quality of light, its color consistency and uniformity.

Why? Because these 'qualitative' aspects bring different advantages to different applications. In retail environments, lighting creates attractive stores where people like to shop. In industrial settings, lighting enhances visual acuity, providing the right illumination to keep productivity high.

And key to this is where the light actually falls, which is why optical distribution is so important. Thanks to the OptiSuit portfolio of lenses, Maxos fusion promises a superior choice of 11 different optical distributions. These uniquely-designed lenses provide the right light, precisely where it is required for the targeted application. At the same time, it maintains the highest quality and uniformity of light to create a consistent look and feel.

In addition to creating attraction, providing guidance and maximizing clarity, OptiSuit lens plates are also designed to optimize the:

- sleek appearance of the fixture
- consistency of light color in all directions
- glare limitation
- accent factor
- beam characteristics

## Designed for modularity

What makes the OptiSuit™ portfolio unique is its revolutionary concept. A series of precisely-designed lenses deliver and direct the light in the most efficient way possible, while maintaining consistent qualitative color parameters. This optical portfolio is used as a building block to develop linear panels for trunk mounting, or non-linear panels for track mounting. That means OptiSuit™ offers lighting designers and engineers a diverse range of luminaires with the same advantages, to create bespoke solutions that fulfil the exact requirements of retail or industrial applications. For example, OptiSuit™ can be used to create a linear LED panel (Maxos fusion) of up to 2.3 meters in length. Or it can be used to create a rectangular panel (StoreSet) of 200 x 600mm.

## Optimized for a wide range of applications

The OptiSuit™ portfolio is suitable for a wide range of applications, from high bay and low bay areas, to small narrow corridors and large open spaces. Due to the unique shape of the lenses, the light emitted by each LED is transformed in such a way that, collectively, they provide high quality light that is directed for a specific purpose. For example, some OptiSuit™ optics are dedicated to back office and general lighting requirements. Others are especially designed for retail aisles, directing light to shelves and displays to attract more attention to the merchandise. And some are intended to optimize the routing of people and products in factory or warehouse environments.

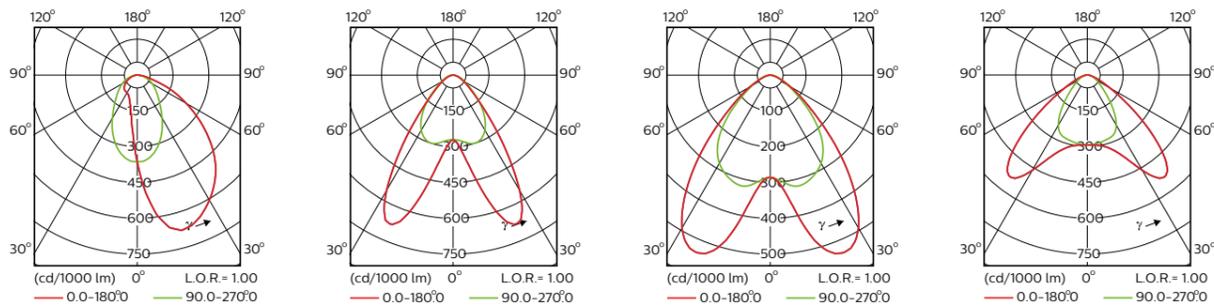

### A choice of beam characteristics

In terms of lighting design, light distribution is just as important as visual comfort and should be dedicated to illuminating the space according to how it is used. With a portfolio of 10, well-balanced beam options from extra narrow to very wide beam, OptiSuit™ can optimize the lighting in every application (see below). All beams are characterized by very smooth, continuous beam shape, ensuring there are no visible luminance discontinuity transitions on the illuminated surfaces.

Looking for dedicated retail lighting? Maxos fusion with OptiSuit offers you a portfolio of seven different light beams. Combined with a choice of lighting colors and lumen packages, this means you can specify Maxos fusion for virtually any and every retail aisle geometry.

## The complete OptiSuit™ beam portfolio for retail lighting applications

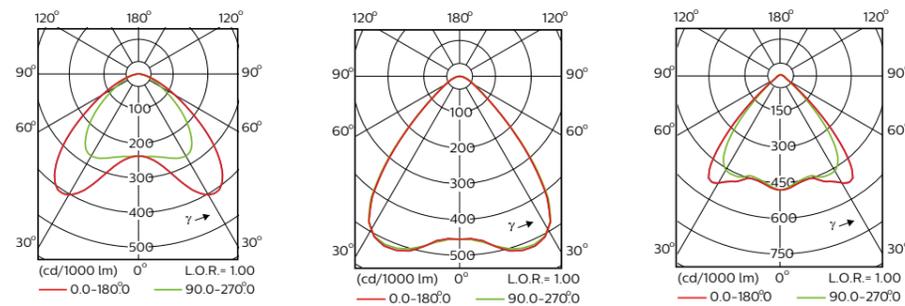

**A20** (Asymmetric beam)

**DA25N** (Double asymmetric Narrow)

**DA25W** (Double asymmetric Wide)

**DA35W** (Double asymmetric Wide)

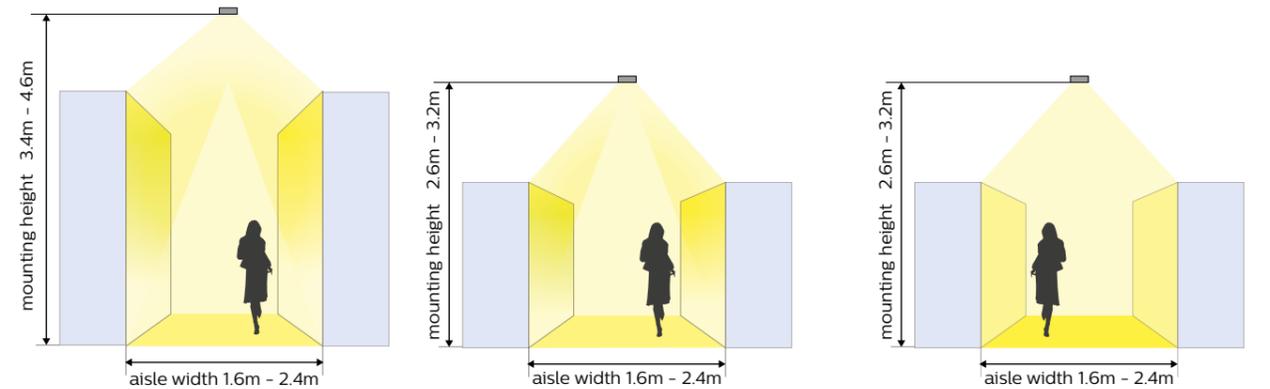

**DA45** (Double asymmetric)

**WB** (Wide beam)

**WB-OC** (Wide beam – Office compliant)

## Retail aisles

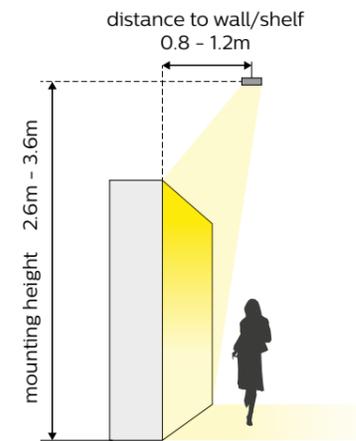

Contrast on vertical shelf

Focus on horizontal illuminance

The balance between contrast on the vertical shelf and horizontal illuminance can be determined by varying the beam choice.

Recommended optics in retail stores	Aisle width [m]					Contrast on vertical shelf (h <sub>shelf</sub> < 2.2m):	Horizontal illuminance
	1.6	1.8	2.0	2.2	2.4		
Mounting height [m]	4.8	NB	NB	MB	DA25N	DA25N	DA45 ↑ + DA35W DA25W DA25N WB MB NB ↓ -
	3.6	DA25N WB	DA25N WB	DA25N WB	DA25N	DA25N	
	3.2	WB	DA25W DA25N WB	DA25W DA25N WB	DA35W DA25N	DA25W DA25N	
	2.8	DA25W DA25N WB	DA25W DA25N WB	DA45 DA35W DA25W	DA45 DA35W	DA45 DA35W	
	2.6	DA25W WB	DA35W DA25W WB	DA45 DA35W WB	DA45	DA45	

## Retail walls

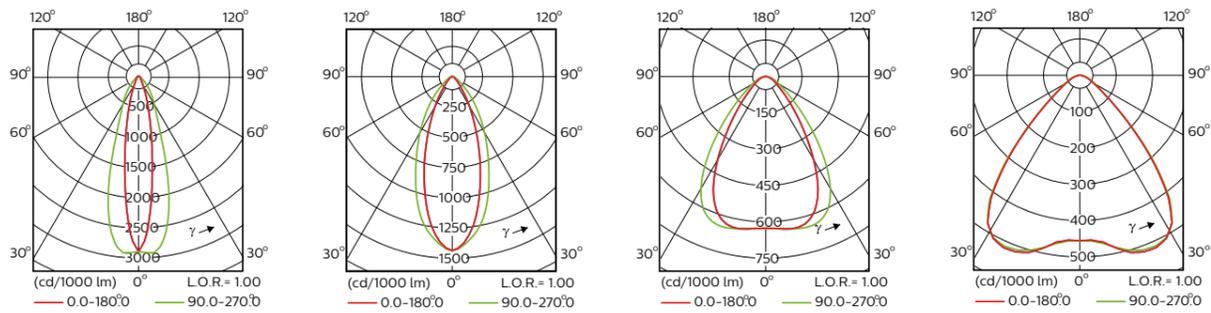

Recommended optics in retail stores	Aisle width [m]				
	1.6	1.8	2.0	2.2	2.4
Mounting height [m]	3.6			A20	A20
	3.4			A20	A20
	3.2			A20	A20
	3.0			A20	A20
	2.8	A20	A20	A20	A20
2.6	A20	A20	A20	A20	A20

\*Height of wall is mounting height - 0.5m

The asymmetric OptiSuit™ optic has a very wide application coverage.

## The complete OptiSuit™ beam portfolio for industry lighting applications

**XNB** (Narrow beam)

**NB** (Narrow beam)

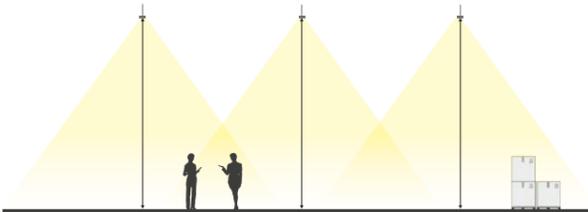

**MB** (Medium beam)

**WB** (Wide beam)

For industrial lighting ranges, Optisuit™ offers four suitable beam characteristics, six lumen packages and two energy choices. From a normal downward beam to wide beam options, you can select the right optics and choose how best to install them based on their

light distribution curve. In retail and industry lighting applications, functional lighting for back room offices, control rooms and cash areas that require a low direct glare (UGR 19) can be optimized by specifying the WB-OC optic.

### Open spaces

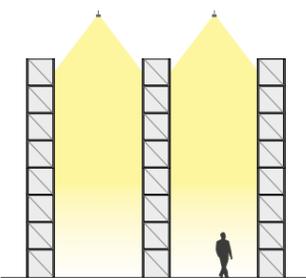

Wide, medium and narrow beam OptiSuit™ optics are recommended for open spaces depending mounting height and required illuminance.

Recommended optics in open spaces*	Mounting height of light line [m]					
	3	6	9	12	15	
Illuminance [lux]	750	WB	MB	MB	NB	NB
	500	WB	MB	MB	NB	NB
	300	WB	WB	MB	MB	NB
	200	WB	WB	WB	MB	NB

\*Depending on space dimensions

### Industry warehouses

A combination of wide, medium and narrow beam OptiSuit™ optics are suitable for warehouses.

Recommended optics in warehouses*	Mounting height of light line [m]					
	3	6	9	12	15	
Illuminance [lux]	300	WB	MB	NB	NB	XNB
	200	WB	MB	NB	NB	XNB
	150	WB	MB	NB	NB	XNB

\*Depending on space dimensions

# Introducing Maxos fusion XA

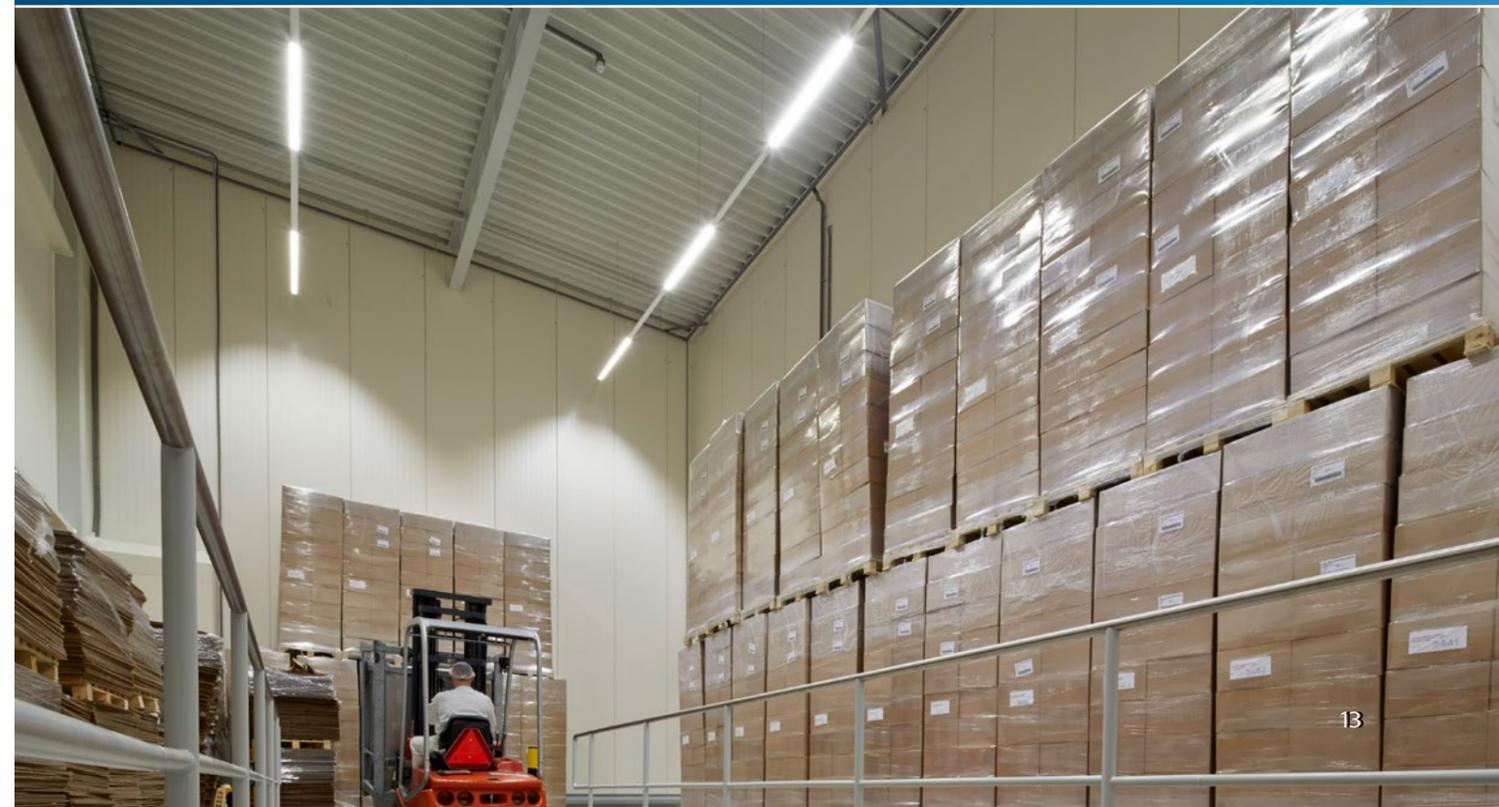

Energy consumption will always be a priority for commercial customers. Maxos fusion XA is an economical choice with very high efficacy as one of its many benefits. What's more, with lumen maintenance of 100,000 hours @L80, it offers even more possibilities to optimize your lighting design. For example, not only does the long lifetime enable better planning, extending the maintenance period also promises a more attractive total cost of ownership, which is another key consideration for retail and industrial applications.

Maxos fusion  
Industry and retail lighting  
Maxos fusion XA

Specification			
Electrical unit	Efficacy	Lumen depreciation at 50k hrs	Lumen depreciation at 100k hrs
LL512X and LL523X	up to 151 lm/W	L90*	
LL512X HE and LL523X HE	up to 179 lm/W	L90	L80
LL512X XA and LL523X XA	up to 185 lm/W	L90	L80

\*LL523X LED160S is L80

# Bringing you benefits with our circular economy approach

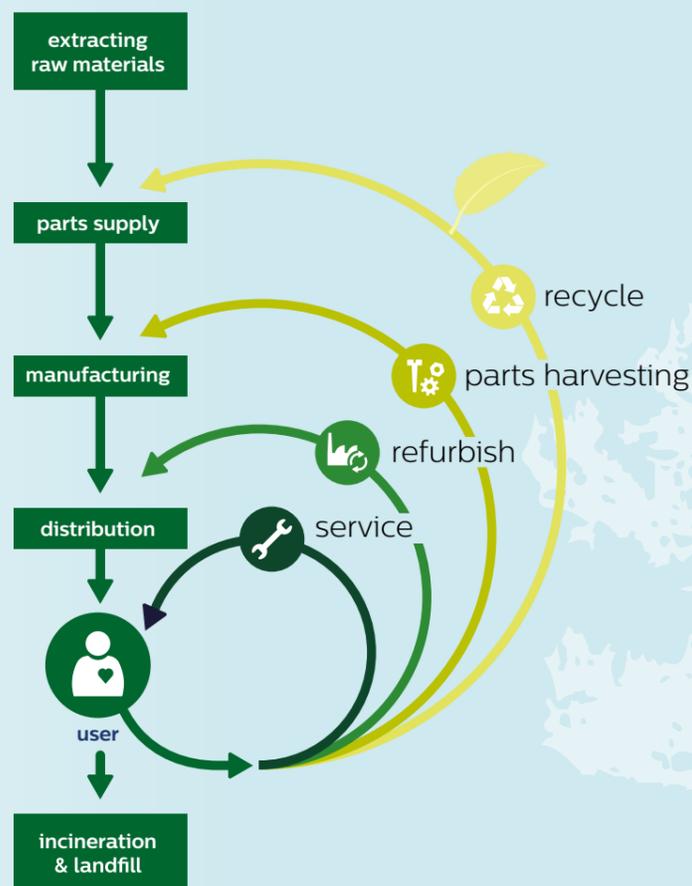

## What if...

...we enable your luminaires to meet your evolving needs beyond their rated service life from start to finish – including service and repair, upgrades and replacements – while you just enjoy the best lighting performance?

Because in a truly circular economy, everyone benefits - including our planet itself. And because our purpose is to unlock the extraordinary potential of light for brighter lives and a better world. The circular economy aims to source and use renewable materials in our luminaires and components towards maximum effectiveness, while reducing landfill waste. With this in mind, we join forces with our customers, providing you with energy efficient luminaires and their easy maintenance, repair, upgrades and replacement. Maintenance services are designed to be simple, fast and efficient, saving you time and money. And of course, we provide sophisticated technological upgrades, as and where needed to keep your lighting fit for purpose.

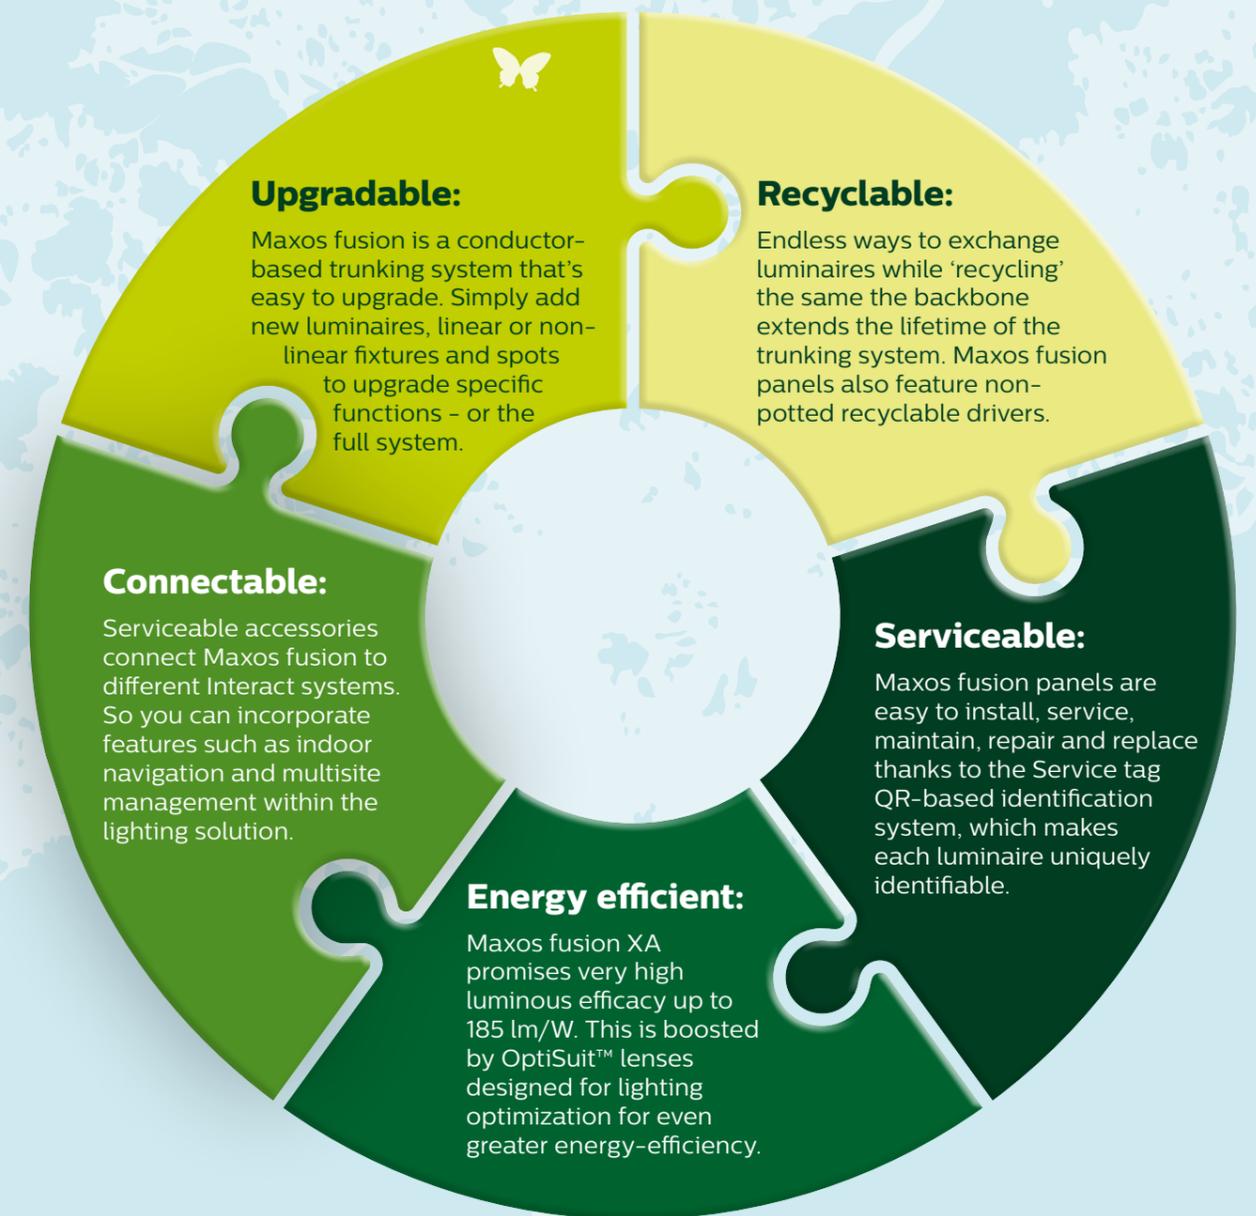

Our circular lighting solutions include innovative managed service models with end-of contract options, intelligent asset management systems and circular economy ready luminaires, guaranteeing optimal performance. We work with partners to ensure collection and recycling of end-of-life components and luminaires. You benefit from immediate cost savings resulting from long-term functionality. Not to mention the least possible environmental impact.

Life Cycle Assessments have been conducted for all Circular Economy ready luminaires

## We've designed luminaires for outdoor and indoor use with the circular economy in mind.

## Get ready to meet 5 vital benefits for our customers and our planet

## Interact Retail propositions

### Scene management

Interact Retail Scene management allows you to create stunning and flexible retail spaces, as you can use light to create a memorable shopping experience. With Interact Retail Scene management you can easily adjust the lighting for different moments of the day, seasons and events to help reinforcing your brand, increasing sales or boosting return visits.

### Indoor navigation

Interact Retail Indoor navigation supports personalized, convenient shopping and new staff efficiencies with hyper-accurate indoor positioning powered by technology embedded in LED luminaires. When integrated into a retailer app, it helps shoppers to find products, take advantage of pop-up promotions, or even see recipe suggestions for the ingredients they are about to purchase. For staff, it can help guiding when they are restocking shelves or fulfilling an online order. Interact Retail Indoor navigation can be enabled with Maxos fusion with VLC capabilities.

### Multisite management

This extension of Interact Retail provides an intuitive dashboard to monitor and manage your retail spaces. Multisite management creates a network of connected stores, which allows to monitor and manage multiple stores and retail distribution centers remotely from a single dashboard. It gives insights into energy savings and lighting failures and allows managing lighting schedules and scenes for a chain of stores.

# Bring your Maxos fusion to the next level with Interact Retail

Interact Retail software applications are specifically designed to bring together connected lighting systems and the data that those systems collect with your other smart retail solutions. These Interact Retail software applications can be integrated with Maxos fusion, to get the most out of your system.

## Sensor units

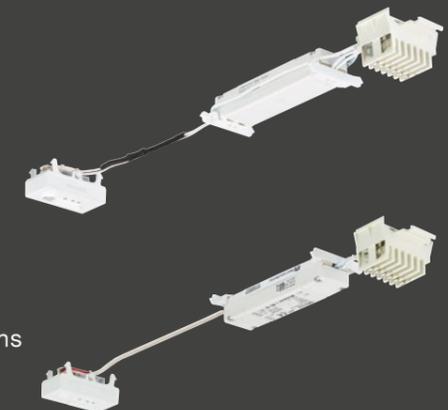

Unlocking the Maxos fusion potential with Interact Retail

### Wireless group controller LL500E WGC

- Reduce installation costs, time and complexity
- More individually dimmable groups for granular control

### Bluetooth beacon LL500E BTE

- A world of extra possibilities with in-pocket notifications
- Easily plugged into the backbone

# interact Industry

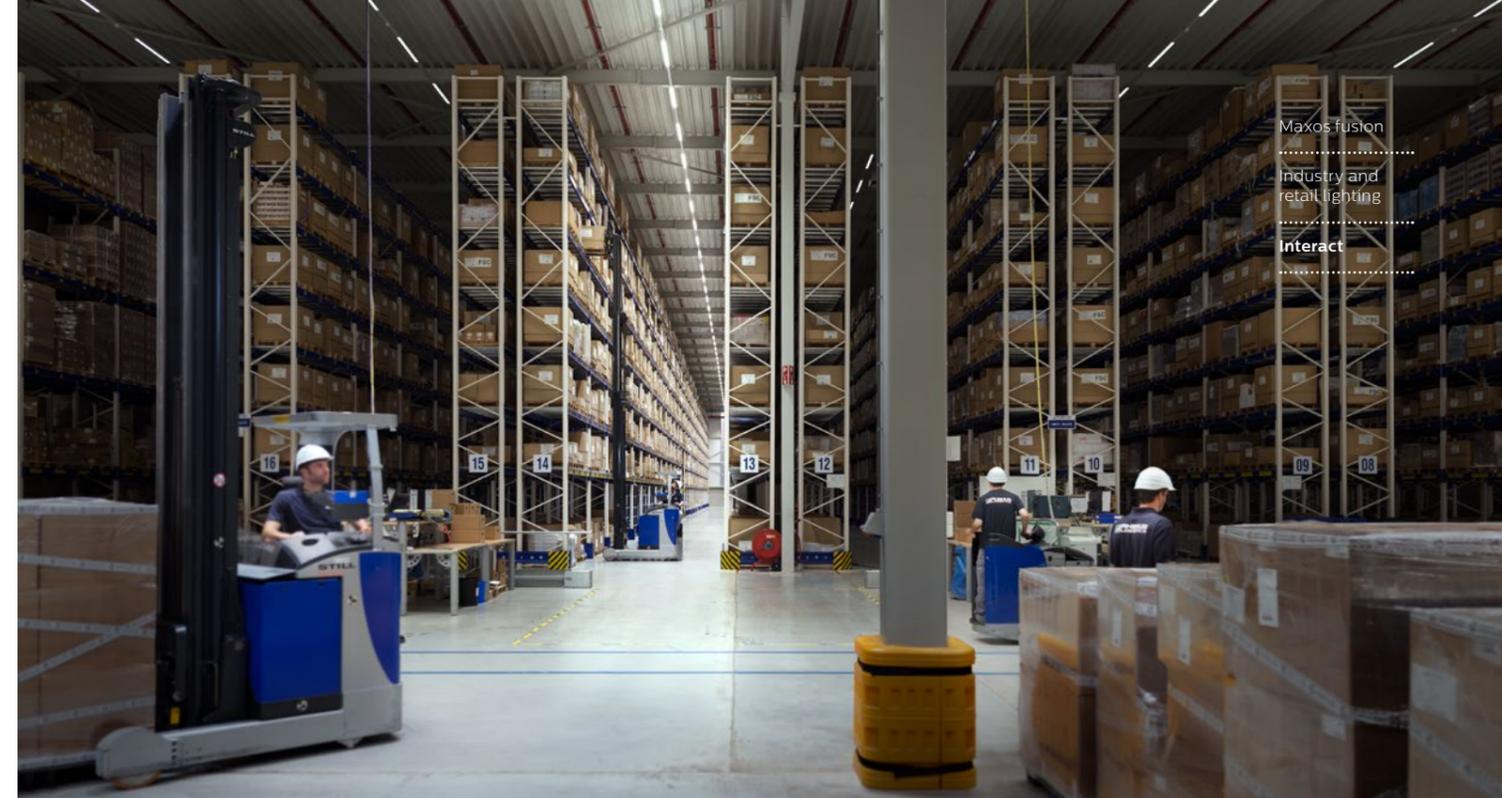

## Bring your Maxos fusion to the next level with Interact Industry

All sensor ready Maxos fusion panels are compatible with Interact Industry. Interact Industry provides a platform for innovation that enables users to optimize efficiency, maximize energy savings and improve productivity and safety.

Interact Industry software applications are specifically designed to bring together connected lighting systems and the data that those systems collect with your other smart industry solutions.

applications through insights and data. At the same time, the centralized lighting management module helps reducing operational costs, track compliance and plan maintenance efficiently. All combined, this helps you to take real-time, data-based decisions.

The value of connected lighting is extended by Interact, as it provides lighting management and value-added

Maxos fusion  
Industry and retail lighting  
Interact

### Sensor units

To maximise the potential of system connectivity, all sensor ready Maxos fusion panels are compatible with Interact

Interact Industry  
LL500E H4  
sensor unit

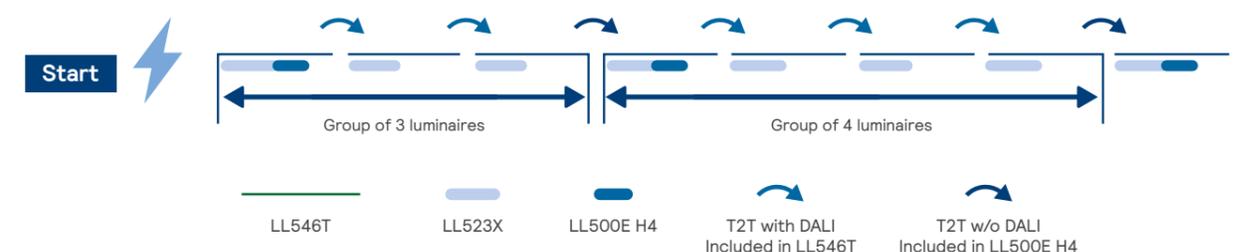

### System specifications

So how does it work in practice? The sensor is shown in green in the diagram below (LL500E H4). It communicates with multiple luminaires via the SR protocol, which is enabled throughout the Maxos fusion trunking.

You can divide the network into zones, grouping luminaires together so they act in exactly the same way. Groups of luminaires can also be defined and controlled by the Track-2-Track (T2T) connectors without a DALI interface (as included with the sensor unit).

One sensor can control up to four luminaires, which can be grouped in various ways. This enables you to customize the lighting in an area to create the right lighting scene for its specific use.

## Customer stories Netto 3.0

“

The great advantage of Maxos fusion lighting is not only good lighting quality, but more importantly, energy efficiency and cost effectiveness. In 2020 we are planning on opening over 40 stores in accordance with our 'Netto 3.0' concept using a range of Philips products.”

**Wojciech Wolny**  
Manager at Netto's Technical Department

## Netto 3.0

Netto 3.0' is the latest concept of Danish chain store Netto, which has had a presence in the Polish market for the past 24 years. With 380 locations, they are one of the biggest retail brands in Poland and more importantly; they offer a unique concept to their customers with 'Netto 3.0'. Netto stores offer quality products according the latest trends, which come to live in the stores, using background music and the right lighting. The result: a successful and tailored customer experience, perfectly fitting the concept of the stores.

The basis for this lighting solution is a Maxos fusion trunking system that offers unmatched freedom and flexibility. The system comes with the option to integrate nonlinear StoreSet luminaires, linear Maxos fusion modules and StyleID Evo accent lighting. This is particularly important in commercial spaces that need to create attractive product displays to attract customers. The unique ambiance can be further created using a variety of fixtures. Netto chose black trunking lines and fixtures for their stores to create the impression of an elegant interior.

With the Maxos fusion solution at Netto, modern and efficient LED technology is brought into all stores, delivering exactly the right amount of light where it's needed and reducing energy costs by over 50% compared to solutions based on traditional lamps.

“

Thanks to the cooperation with Signify we could fully implement the ideas behind our 'Netto 3.0' concept. In our Gdansk location, we have used high-end lighting products like Maxos fusion designed by Philips and that marks just the beginning of our cooperation.”

**Wojciech Wolny-**  
Manager at Netto's Technical Department

“

Not only us, but also our employees are very satisfied with the result. The excellent light makes a very positive contribution to our employees' productivity.”

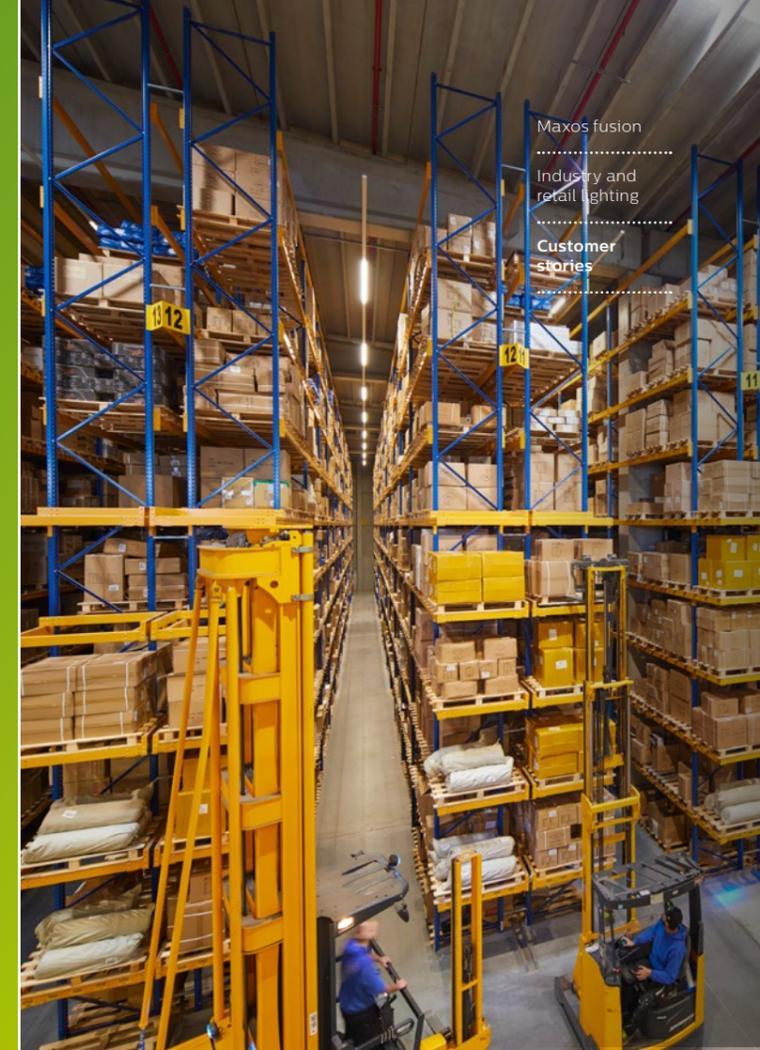

Bruno Loosveldt  
Logistics manager Velleman

## Velleman

Velleman is a Belgian producer and distributor of electronics, operating from their 8,000 m<sup>2</sup> warehouse in Gavere, Belgium. Here, the old gas discharge lamps were no longer adequate, so the aim was to replace them with a sustainable lighting solution. The aim was to increase light levels in the warehouse to improve visibility and create an attractive working environment, at the same time as delivering significant energy savings. After conducting a test with different providers, Velleman chose the Maxos fusion solution, in combination with GreenWarehouse.

The project was carried out by EnergyVision (Ghent, Belgium), a specialist in energy efficiency and results in these numbers:

- **225 Maxos fusion light lines**, extending to 1.1 kilometers.
- **3 times higher illuminance** at floor level - from 50 lux to 170 lux - meeting international standards.
- **50% energy savings** compared to the original lighting installation, by installing LED-based lighting.
- **20% extra energy savings** by using sensors to switch off the lighting when no one is present.

\* Assumptions:

1. Line is assumed to be fully occupied only with Maxos fusion panels.
2. The starter kit for side entry (LL500Z 2x EP CU WH) is the default assumed feed in connection
3. The default MCB consideration is Type B 16A
4. The voltage drop from mains supply to beginning of light line is not considered
5. The voltage drop over the trunking should not exceed 5%.
6. The starter kit for mid entry (LL500Z CM) doubles the maximum trunking length
7. Ask the installer for advice when the trunking line exceeds 120 m (B-16 A).
8. For additional configurations such as semi-continuous line, please contact your Philips representative.
