## Linear Surface

SlimLux

2ft and 4ft

Day-Brite/CFI SlimLux LED is a close-to-ceiling, direct/indirect, surface mount linear luminaire that is designed for installation on t-grid ceilings. It provides even illumination in a small profile, has a unique design that makes installation fast and easy, and can be easily relocated in adaptation to changing application layouts.

- 1 Non-controls options are 0-10v 5% dimming. Controls options are dimmable to 5% via wireless wall switch.
- 2 Emergency options available only with 4' single driver pods.
- 3 347V not available with 2' 8-lightbar (M) driver pods.
- 4 347V not available with emergency options.
- 5 Not available with 347V option
- 6 Note that each Driver Pod is designed for the exact amount of lightbars. For example: Q pod must be installed and operated with 4 lightbars.
- 7 Available with only single (S) driver pod option.
- 8 Available only with DIM1 lightbar driver option.
- 9 Not available on 2ft driver pod configurations.
- 10 Requires IRT9015 IR remote & Interact Pro App for commissioning.

### Accessories

- SWZDT<sup>8</sup> – SpaceWise wireless controller with daylighting and occupancy, advanced grouping with dwell time functionality (compatible with all 0-10V options, see SWZDT spec sheet)
- SBA<sup>8,10</sup> – Interact Ready System Bridge Accessory, refer to Philips System Bridge Accessory specification sheet for options and ordering details
- IRT9015 – handheld remote for grouping and configuration (at least one remote required for any SWZCS installation).
- UID8451/10 – Wireless Dimmer Switch Selector
- UID8461/10 – Wireless Scene Selector

### Dimensions

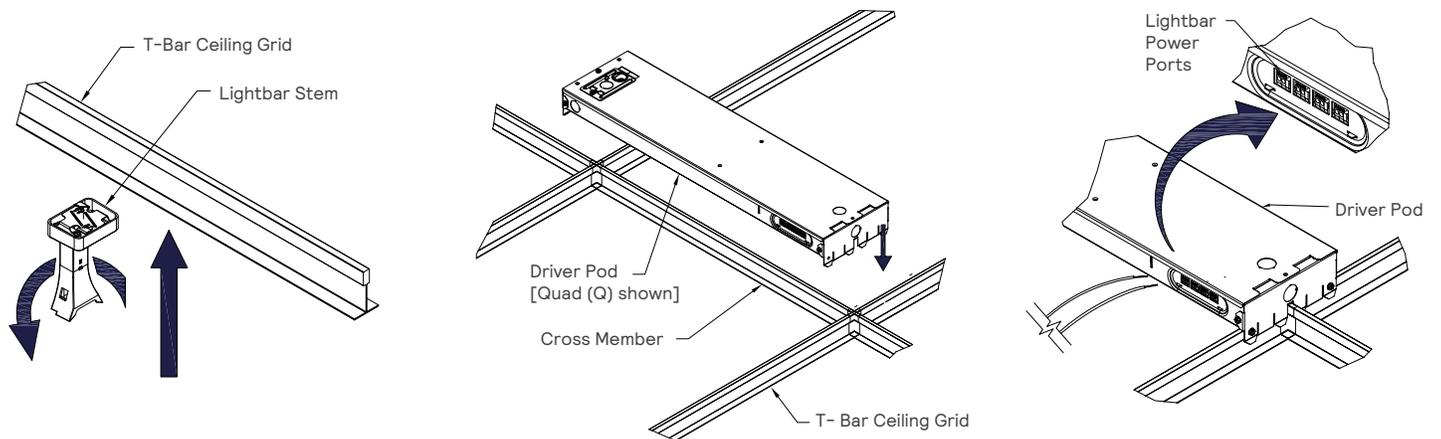

#### Lightbar

#### Driver Pod

### Easy Installation

\*All Driver Pod Ports must be connected to individual Lightbars.

\*\*Single (S) driver pod is direct wire to lightbar. Quad (Q) and Oct (M) driver pods include two-port push in wire connections.

\*\*\*Oct (M) driver pod includes four connection ports on each side of splice box.

## 2 and 4ft

### Specifications

#### Optical System

The optical system is driven by thin LEDs coupled to a unique optical lens. The asymmetric multifaceted reflection/refraction lens has been specifically engineered to create efficacious and homogeneous light extraction, providing a wide upper-hemisphere distribution and a subtle glow which can be seen from below. The distribution for this luminaire is 90% up-light and 10% down-light.

#### Construction

- Housing: Polycarbonate
- Mounting: Stems and light bar ends are made from injection molded polycarbonate
- Luminaire Weight : 2lb/4ft; 0.5lb/2ft

#### Electrical

- SlimLux lightbars are to be installed only with SlimLux driver pods.
- Lightbars are class 2 low voltage, 30-36VDC typical.
- Lightbar power stem includes 19" class 2 wiring with thinned ends.
- Driver pods (ordered separately) are connected to building mains in the ceiling plenum space. Low voltage wires (by others) provide power to the lightbars.
- Single driver pods are direct wire to lightbars. Quad (Q) and Oct (M) driver pods include two-wire push in ports.
- Driver pods include integral clips for mounting to T-bar above the ceiling.
- Compliance to CAN ICES-005-A/ NEB-005-A and FCC Part 15-A.

#### Standard Drivers

- Advance Xitanium 0-10V, 5-100% (DIM1 option code).
- Class 2 rated output, Consult Day-Brite for other available drivers.
- Power Factor: >0.90
- Total Harmonic Distortion: <20%
- Other driver options including step dimming and Lutron are available.

#### Optional Battery Pack

- Bodine, 90 min, 6W or 10W. Class 2 rated output, located in the remotely mounted Driver Pod Emergency lumen output.

#### Lumen Maintenance

LEDs have been tested by the manufacturer in accordance with IESNA LM-80 at an ambient temperature of 25°C, the LED lumen maintenance expectation according to IES TM-21-11 is: L70 >70,000 hrs suspended (Reported methodology).

#### Source Color

LEDs rated for color rendering CRI >80, R9 >9 and fixture color accuracy within 3 SDCM.

#### Ends

- Easy plug and play installation with nominal 4ft modules and 2ft modules. See dimension drawings for exact measurements.

#### Mounting

- Stems are compatible with NEMA G 15/16" wide T-bar.
- Stems twist lock to T-bar and lightbar snaps to stem for quick installation.
- Standard mounting allows for a flush ceiling tile only. For tegular tiles, refer to dimensional line art for stem top dimensions.

#### Validation

- cETLus listed for use in damp locations .
- CCEA Chicago Plenum option available.
- IC Rating: for Driver Pods with 1 and 4 lightbars only.
- Lightbars are RoHS compliant.
- SlimLux luminaires are Designlights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers ([www.designlights.org/QPL](http://www.designlights.org/QPL)).
- SlimLux is DLC standard listed as a DC system in the linear ambient luminaire with indirect category.

#### WELL Building Standard®

The WELL Building Standard® is the first standard to integrate human health and wellness into the design, construction, maintenance and operations of buildings. SlimLux contributes toward satisfying feature LQ4 under the WELL Building Standard®. International WELL Building Institute™ and the related logo are trademarks used with permission from the International WELL Building Institute™.

#### Environment

Rated for dry or damp locations in operating ambient temperatures 0-30°C (32-86°F).

Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility. Not suitable for natatorium environments.

#### Warranty

Five-year luminaire limited warranty including LED boards and driver pods. Visit [www.signify.com/warranties](http://www.signify.com/warranties) for complete warranty information.

## 2 and 4ft

### Wireless Controls Options

#### SpaceWise DT (SWZDT)

- Remote mounted, installed as an accessory controlling up to 730VA load at 120V.
- Commissioning via compatible Android phone and Philips Field App
- Dimming via compatible Zigbee wireless wall switch only (see link below for details)
- Register for the commissioning app at <http://registration.componentcloud.philips.com/appregistration/>
- Integral sensing options may not be combined
- For more information including recommended switches, refer to the following: -  
**SWZDT** - [www.usa.lighting.philips.com/systems/lighting-systems/spacewise](http://www.usa.lighting.philips.com/systems/lighting-systems/spacewise)

#### Radio only sensor (RADIO)

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.
