- Chicago Plenum (LC) is not available for Buy American Compliant (BAC) configs.
- Lensed wall wash (LW) style only available with Wide (W) beam (2500lm max).
- Not available with AirSeal (A) frame.
- Not available with AirSeal (A) frame. Available with CL, CC, and CD reflector finishes only.
- Consult factory with ETO request for black (B) flange for all styles.
- Linear driver profile. See dimensional data following. Specify only with non-IC (N) frame, not for use with LC or EM6 options.
- Retrofits select legacy Lightolier luminaires. See pages 2 and 6 for details.
- Flex install requires light engine & trim only (up to 4000lm only). Accessory frames available. Not compatible with standard frames and associated options. Not available with Interact (RA) dimming and IEM6 trim.
- Requires IRT9015 IR remote and Interact Builder App for commissioning (requires above ceiling access).
- BAA compliance requires that BAC option be selected for each of frame, engine/trim. Frame and engine will be ordered/shipped together; trim will be ordered/shipped separately. Accessories (optional) are not currently BAA-compliant.
- Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies. Genlyte's products with a BAC option code designation are manufactured in the US and utilize a BAA COTS exemption rule for compliance. "BABA" designates the product will meet the standards set by FHWA for BABA and FTA for Buy America. As noted, for FHWA BABA compliance, applicable projects must be funded by October 1, 2026.

### Reflectors

**Specular clear (CL):** Most specular and most efficient finish, delivers maximum photometric performance but can produce a mirror image effect of the interior space.

**Comfort clear (CC):** Semi-specular finish that softens the light at the source of the reflector and creates a subtle, even luminance from the reflector cone.

**Comfort clear diffuse (CD):** Slightly diffuse clear finish, which eliminates iridescence and reduces the mirror image effect inherent with a specular finish.

**White (-): (matte)** Brightest aperture when illuminated and provides the smoothest transition to most ceilings when off (white is only available with a white flange).

**Black (BK):** Painted matte finish that provides the lowest aperture brightness possible and reduces source identification in a ceiling significantly.

### Flanges

**White (-): (matte)** Provides the smoothest transition to ceilings when off.

**Black (BK):** Painted matte finish that provides the lowest aperture brightness possible.

**Aluminum (A):** Painted aluminum finish to more closely match visual appearance of anodized inner trim surface.
